

100 Advanced C1–C2 English Vocabulary Activities

A Master Curriculum Grounded in *Oxford Word Skills (Upper-Intermediate & Advanced)* by Ruth Gairns & Stuart Redman

Module 1: Personality, Human Behavior & Psychological Traits

Activity #1: Evaluating Leadership Traits in Corporate Audits

CEFR: C1 | Advanced

Skill / Subskill: Writing — Nuanced personality adjectives & behavioral lexicon **Activity Type:** Corporate Assessment

Objective: Analyze executive leadership behaviors using precise personality descriptors (e.g., charismatic, meticulous, pragmatic, unscrupulous, visionary).

Instructions: Write a 2-sentence executive evaluation of a CEO navigating a corporate crisis.

Task Prompt: Prompt: Evaluate a CEO who remains calm, acts logically without emotional bias, but makes ruthless decisions.

Expected Output: Output: 'The Chief Executive demonstrated exceptional pragmatism and composure under pressure, remaining unperturbed by market panic. However, her decision to terminate senior staff without consultation was criticized as ruthlessly unfeeling.'

Activity #2: Psychological Trait Contrasts in Peer Reviews

CEFR: C1 | Advanced

Skill / Subskill: Writing — Contrasting character traits & behavioral nuances **Activity Type:** Peer Feedback Drafting

Objective: Distinguish between deceptively similar personality adjectives (e.g., assertive vs. aggressive, frugal vs. stingy, confident vs. arrogant).

Instructions: Draft a peer feedback entry clarifying a manager's workplace communication style.

Task Prompt: Prompt: Differentiate between the manager's firm guidance and aggressive behavior.

Expected Output: Output: 'While team members appreciate her assertive direction during project deadlines, her tone during debriefs occasionally borders on confrontational, making staff hesitant to share candid feedback.'

Activity #3: Spotlight Analysis: Idiosyncrasies & Behavioral Quirks

CEFR: C2 | Mastery

Skill / Subskill: Speaking/Writing — Idiomatic character descriptors

Activity Type: Character Profiling

Objective: Deploy advanced idioms and 'Spotlight' expressions (e.g., set in one's ways, larger than life, a dark horse, wear one's heart on one's sleeve) in character portraits.

Instructions: Write a concise psychological profile of an influential political figure.

Task Prompt: Prompt: Describe a politician who reveals little about personal motives but possesses commanding public charisma.

Expected Output: Output: 'In public forums, the senator presents a larger-than-life persona that commands immediate attention. Privately, however, he remains a complete dark horse, keeping his strategic calculations closely guarded from even his inner circle.'

Activity #4: Emotional Intensity Calibration in Conflict Resolution

CEFR: C1 | Advanced

Skill / Subskill: Speaking — Gradable & non-gradable emotional vocabulary

Activity Type: HR Mediation Roleplay

Objective: Calibrate emotional intensity using precise modifiers and non-gradable adjectives (e.g., mildly irritated, utterly despondent, fiercely defensive).

Instructions: Roleplay a HR mediation scenario expressing controlled frustration over repeated policy non-compliance.

Task Prompt: Prompt: Express deep concern about compliance lapses without resorting to unprofessional language.

Expected Output: Output: 'I am profoundly unsettled by the repeated compliance oversights in Q2. While I understand the department was under strain, such negligence is wholly unacceptable in a regulated financial environment.'

Activity #5: Deconstructing Unconscious Bias in Performance Reviews

CEFR: C2 | Mastery

Skill / Subskill: Writing — Abstract nouns & psychological terminology

Activity Type: Objective Performance Writing

Objective: Identify and replace subtle biased phrasing with objective psychological and behavioral terminology (e.g., cognitive dissonance, confirmation bias, implicit prejudice).

Instructions: Rewrite a subjective performance review entry to conform to objective corporate standards.

Task Prompt: Task: 'He seems stubborn and doesn't like changes proposed by younger colleagues.'

Expected Output: Output: 'The employee exhibits cognitive rigidity when presented with alternative workflow methodologies, demonstrating a marked reluctance to integrate peer-driven technological updates.'

Activity #6: Evaluating Social Dynamics in Cross-Cultural Teams

CEFR: C1 | Advanced

Skill / Subskill: Writing — Sociological & interpersonal vocabulary

Activity Type: Management Memo Formulation

Objective: Incorporate cross-cultural collaboration vocabulary (e.g., cultural nuance, group cohesion, egalitarian structure, hierarchy) in team management reports.

Instructions: Draft a recommendation memo for restructuring a global remote engineering team.

Task Prompt: Task: Explain why replacing rigid hierarchy with egalitarian communication improves innovation.

Expected Output: Output: 'Transitioning from a rigid hierarchical model to an egalitarian framework fosters open dialogue across international hubs. Unfettered communication enhances group cohesion and ensures subtle technical nuances are addressed early.'

Activity #7: Spotlight: Idiomatic Mental States in High-Stakes Negotiations

CEFR: C2 | Mastery

Skill / Subskill: Speaking — Mental state idioms & collocations

Activity Type: Debrief Writing

Objective: Utilize idiomatic mental state expressions (e.g., keep a cool head, at one's wits' end, lose one's composure, see eye to eye) under pressure.

Instructions: Draft a debrief note following a tense labor contract negotiation.

Task Prompt: Task: Describe how maintaining composure prevented negotiation collapse.

Expected Output: Output: 'Despite intense provocation from the union delegates, our lead negotiator kept a cool head throughout the 14-hour session. Although both parties were at their wits' end, his steady demeanor prevented a complete breakdown in talks.'

Activity #8: Analyzing Moral & Ethical Stances in Corporate Governance

CEFR: C1 | Advanced

Skill / Subskill: Writing — Ethics & integrity lexicon

Activity Type: Governance Assessment

Objective: Apply ethical descriptors (e.g., scrupulous, compromised, ethically ambiguous, fiduciary duty) in governance evaluations.

Instructions: Assess a board member's potential conflict of interest in an acquisition deal.

Task Prompt: Task: Evaluate an unannounced personal financial stake in a vendor firm.

Expected Output: Output: 'Failing to disclose personal holdings in the vendor firm represents a compromised ethical stance that directly breaches fiduciary duty. Board members must maintain scrupulous transparency in all third-party dealings.'

Activity #9: Describing Non-Verbal Communication & Micro-Expressions

CEFR: C2 | Mastery

Skill / Subskill: Writing — Kinesics & non-verbal descriptors Activity Type: Investigative Observation

Objective: Incorporate non-verbal communication terminology (e.g., stoic expression, subtle gesture, defensive posture, fleeting glance) in investigative journalism.

Instructions: Write a short courtroom observation paragraph analyzing a witness's demeanor.

Task Prompt: Task: Describe a witness who attempts to appear calm but reveals anxiety through physical cues.

Expected Output: Output: 'While the witness maintained a stoic facial expression during cross-examination, his rigid posture and nervous tapping revealed underlying distress. A fleeting glance toward defense counsel betrayed significant hesitation before answering.'

Activity #10: Personalized Reflection: Navigating Career Transitions

CEFR: C1 | Advanced

Skill / Subskill: Speaking/Writing — Self-assessment & career development lexicon Activity Type: Personal Career Vision

Objective: Articulate personal career values, ambitions, and adaptability using advanced self-evaluation vocabulary (e.g., career trajectory, pivotal moment, core competence, professional pivot).

Instructions: Draft a 100-word career vision statement for an executive MBA application.

Task Prompt: Task: Describe a pivotal career moment that prompted a transition into sustainable tech.

Expected Output: Output: 'A pivotal moment in my career occurred when leading a legacy supply chain overhaul, realizing that operational efficiency must align with environmental stewardship. Levering my core competence in systems engineering, I executed a strategic professional pivot into sustainable technology leadership.'

Module 2: Advanced Workplace, Career Trajectories & Executive Leadership

Activity #11: Executive Resignation Memos & Strategic Transitions

CEFR: C1 | Advanced

Skill / Subskill: Writing — Corporate transition & diplomatic terminology Activity Type: Corporate Announcement

Objective: Draft executive departure communications using formal organizational phrasing (e.g., step down, pursue other endeavors, seamless transition, interim leadership).

Instructions: Compose an official corporate announcement regarding an outgoing Chief Technology Officer.

Task Prompt: Task: Announce the CTO's departure after ten years, emphasizing gratitude and continuity.

Expected Output: Output: 'After a decade of transformative leadership, Dr. Aris Thorne has decided to step down as Chief Technology Officer to pursue philanthropic endeavors. The Board expresses profound gratitude for his service and has appointed an interim steering committee to ensure a seamless leadership transition.'

Activity #12: Spotlight: Labor Market Terminology & Human Capital

CEFR: C2 | Mastery

Skill / Subskill: Writing — Human resources & macroeconomic labor terms **Activity Type:** Workforce Strategy Analysis

Objective: Utilize labor market vocabulary (e.g., headhunting, talent drain, competitive compensation package, attrition rate) in workforce strategy memos.

Instructions: Analyze the causes of high turnover in a software engineering division.

Task Prompt: Task: Explain how uncompetitive packages lead to talent drain to industry rivals.

Expected Output: Output: 'Our diagnostic audit indicates that elevated attrition rates among senior developers stem directly from uncompetitive compensation packages. To stem this ongoing talent drain, HR must partner with executive headhunters to restructure our equity incentive framework.'

Activity #13: Formulating Performance Improvement Plans (PIPs)

CEFR: C1 | Advanced

Skill / Subskill: Writing — Directive & corrective management lexicon **Activity Type:** Management PIP Formulation

Objective: Construct clear, legally defensible PIP objectives using corrective action verbs (e.g., rectify, deliver, adhere to, demonstrate competence).

Instructions: Draft a corrective objective for an account manager experiencing declining client satisfaction.

Task Prompt: Task: Require the manager to increase client outreach and resolve pending tickets within 30 days.

Expected Output: Output: 'The account manager must rectify communication delays by establishing bi-weekly check-ins with top-tier clients. Furthermore, the employee is required to resolve all open service tickets within 48 hours to demonstrate full operational competence by October 30.'

Activity #14: Negotiating Equity & Severance Agreements

CEFR: C2 | Mastery

Skill / Subskill: Speaking — Legal-commercial contract vocabulary **Activity Type:** Executive Negotiation

Objective: Deploy contract negotiation terms (e.g., golden parachute, non-compete clause, vesting schedule, severance package) in executive negotiations.

Instructions: Roleplay an executive contract review negotiating a 2-year non-compete restriction.

Task Prompt: Task: Challenge a restrictive non-compete duration during executive onboarding.

Expected Output: Output: 'While I accept the necessity of protecting corporate intellectual property, a 24-month global non-compete clause severely restricts my future mobility. I propose reducing the restriction to 12 months in exchange for an accelerated stock option vesting schedule.'

Activity #15: Spotlight: Workplace Bureaucracy & Administrative Red Tape

CEFR: C1 | Advanced

Skill / Subskill: Writing — Organizational dynamics & operational friction lexicon

Activity Type: Process Improvement Proposal

Objective: Critique operational inefficiencies using administrative vocabulary (e.g., red tape, bureaucratic bottleneck, streamline, operational friction).

Instructions: Write a proposal excerpt recommending process automation for procurement.

Task Prompt: Task: Describe how manual approval chains delay project initiation.

Expected Output: Output: 'Current procurement protocols suffer from severe bureaucratic bottlenecks, requiring multi-layered sign-offs for minor expenditures. Automating purchase order approvals will eliminate operational friction and significantly accelerate project deployment cycles.'

Activity #16: Evaluating Corporate Mergers & Organizational Culture Clashes

CEFR: C2 | Mastery

Skill / Subskill: Writing — M&A; & organizational psychology terms

Activity Type: M&A; Risk Assessment

Objective: Assess post-merger integration risks using corporate vocabulary (e.g., cultural alignment, synergy, operational integration, institutional friction).

Instructions: Evaluate the merger of a traditional bank and an agile fintech startup.

Task Prompt: Task: Discuss how contrasting work cultures threaten operational integration.

Expected Output: Output: 'While the merger offers substantial financial synergies, the integration faces acute risk from institutional friction. Synthesizing the traditional bank's risk-averse compliance culture with the fintech startup's rapid deployment ethos demands active cultural alignment strategies.'

Activity #17: Drafting Crisis Management Press Statements

CEFR: C1 | Advanced

Skill / Subskill: Writing — Public relations & crisis communication vocabulary

Activity Type: PR Crisis Statement

Objective: Formulate crisis press releases using reassuring, accountable public relations phrasing (e.g., mitigate impact, full transparency, thorough investigation, rectify fault).

Instructions: Write a public response following a major corporate data security incident.

Task Prompt: Task: Acknowledge the breach, assure public safety, and commit to an external security audit.

Expected Output: Output: 'We deeply regret the unauthorized access to customer data detected on Tuesday. In commitment to full transparency, we have contained the breach, engaged independent cybersecurity auditors, and are taking immediate measures to rectify all system vulnerabilities.'

Activity #18: Spotlight: Professional Discretion & Confidentiality

CEFR: C2 | Mastery

Skill / Subskill: Speaking — Confidentiality & legal compliance terms

Activity Type: Compliance Briefing

Objective: Deploy discretion vocabulary (e.g., strictly confidential, proprietary information, non-disclosure, exercise prudence) in legal briefing sessions.

Instructions: Brief a project team on handling sensitive insider information before a product launch.

Task Prompt: Task: Warn team members against discussing unannounced features in public forums.

Expected Output: Output: 'All technical specifications regarding Project Titan remain strictly confidential under our binding non-disclosure agreements. Team members must exercise absolute prudence and refrain from discussing unannounced product capabilities in any public or informal setting.'

Activity #19: Constructing Executive Performance Reviews

CEFR: C1 | Advanced

Skill / Subskill: Writing — 360-degree appraisal vocabulary

Activity Type: Executive Performance Review

Objective: Draft balanced executive appraisals utilizing sophisticated appraisal descriptors (e.g., strategic foresight, stakeholder engagement, operational agility, delegation).

Instructions: Summarize the annual review of a Senior Vice President of Operations.

Task Prompt: Task: Praise strategic foresight while advising improvement in delegating tactical tasks.

Expected Output: Output: 'The Vice President has demonstrated exceptional strategic foresight, steering the enterprise through market volatility with impressive agility. To maximize organizational effectiveness, she should now focus on delegating routine tactical oversight to regional directors.'

Activity #20: Personalized Professional Pitch: Executive Elevator Brief

CEFR: C1 | Advanced

Skill / Subskill: Speaking — Persuasive personal branding & executive pitch vocabulary

Activity Type: Executive Pitch

Objective: Deliver a 60-second executive elevator pitch highlighting strategic value proposition, key metrics, and vision.

Instructions: Present a personal professional pitch to potential venture capital investors.

Task Prompt: Task: Pitch an AI-driven logistics enterprise, emphasizing cost reduction and rapid scalability.

Expected Output: Output: 'I specialize in transforming legacy supply chains through predictive algorithmic automation. Over the past five years, my platform has cut logistics overhead by 32% for Fortune 500 retailers while maintaining 99.8% fulfillment accuracy. We are now expanding our series-B funding to scale this proven infrastructure globally.'

Module 3: Media, Current Affairs, Politics & Public Policy

Activity #21: Deconstructing Political Spin & Media Bias

CEFR: C1 | Advanced

Skill / Subskill: Writing — Journalistic analysis & bias-neutralization lexicon **Activity Type:** Media Bias Neutralization

Objective: Identify loaded journalistic language and rephrase news excerpts into objective, neutral policy analysis.

Instructions: Neutralize a sensationalist political headline and opening paragraph regarding tax reform.

Task Prompt: Task: 'Government Slams Small Businesses with Brutal Tax Hike to Pay for Radical Schemes.'

Expected Output: Output: 'The legislature has introduced a revised corporate tax bill aimed at expanding public infrastructure investments, raising marginal rates for medium enterprises by 2.5%.'

Activity #22: Spotlight: Legislative Terminology & Parliamentary Procedure

CEFR: C2 | Mastery

Skill / Subskill: Writing — Legal-political & parliamentary vocabulary **Activity Type:** Political Commentary

Objective: Utilize parliamentary and legislative terms (e.g., introduce a bill, bipartisan coalition, filibuster, ratify, amendment) in political commentary.

Instructions: Summarize the legislative passage of a major renewable energy bill.

Task Prompt: Task: Describe how a bipartisan coalition overcame filibuster threats to ratify the bill.

Expected Output: Output: 'Despite persistent threats of a filibuster from opposition members, a fragile bipartisan coalition successfully passed key amendments to the clean energy bill. The legislation was subsequently ratified by a 54-46 senate majority late Friday evening.'

Activity #23: Analyzing Geopolitical Sanctions & Trade Embargoes

CEFR: C1 | Advanced

Skill / Subskill: Writing — International relations & economic policy terms **Activity Type:** Geopolitical Risk Analysis

Objective: Evaluate economic diplomacy tools using geopolitical terminology (e.g., economic sanctions, trade embargo, diplomatic immunity, retaliatory tariff).

Instructions: Draft a risk analysis memo evaluating foreign trade exposure under new tariff regulations.

Task Prompt: Task: Assess how retaliatory tariffs impact domestic agricultural exports.

Expected Output: Output: 'The imposition of retaliatory tariffs by trade partners poses an immediate threat to domestic agricultural exporters. Supply chain managers must diversify export destinations to mitigate revenue drops resulting from escalating economic sanctions.'

Activity #24: Spotlight: Public Opinion Polls & Electoral Trends

CEFR: C2 | Mastery

Skill / Subskill: Writing — Polling statistics & voter behavior vocabulary

Activity Type: Electoral Analysis

Objective: Incorporate polling and demographic terminology (e.g., margin of error, swing voters, voter turnout, exit poll, landslide victory) in election analyses.

Instructions: Analyze pre-election polling data for an upcoming gubernatorial race.

Task Prompt: Task: Discuss how undecided swing voters in suburban districts hold the key to victory.

Expected Output: Output: 'With recent surveys indicating a narrow 2% lead within the margin of error, victory hinges on mobilizing undecided swing voters in key suburban districts. Exit poll simulations suggest that economic messaging will dictate final voter turnout on election day.'

Activity #25: Formulating Foreign Policy White Papers

CEFR: C1 | Advanced

Skill / Subskill: Writing — Diplomatic strategy & defense vocabulary

Activity Type: Foreign Policy White Paper

Objective: Draft diplomatic white paper excerpts using strategic defense and foreign policy phrasing (e.g., deterrence, multilateral alliance, territorial integrity, soft power).

Instructions: Formulate a policy recommendation regarding regional maritime security.

Task Prompt: Task: Advise strengthening multilateral naval alliances to preserve international maritime routes.

Expected Output: Output: 'To safeguard territorial integrity and preserve freedom of navigation in international waters, the State Department should reinforce multilateral defense alliances. Combining joint naval exercises with economic soft power provides a robust strategic deterrence framework.'

Activity #26: Analyzing Investigative Reports on Public Corruption

CEFR: C2 | Mastery

Skill / Subskill: Writing — Anticorruption & forensic auditing terms

Activity Type: Corruption Audit Summary

Objective: Evaluate public corruption investigations using forensic terminology (e.g., embezzlement, nepotism, shell company, whistle-blower, misuse of funds).

Instructions: Summarize an investigative auditor's findings regarding municipal procurement fraud.

Task Prompt: Task: Detail how a municipal official funneled public contracts to shell companies linked to family.

Expected Output: Output: 'The forensic audit revealed a systemic scheme involving nepotism and the misuse of public funds. The municipal official systematically awarded non-bid infrastructure contracts to offshore shell companies controlled by immediate family members.'

Activity #27: Spotlight: Press Freedom & Freedom of Information

CEFR: C1 | Advanced

Skill / Subskill: Speaking/Writing — Media law & civil liberties lexicon

Activity Type: Civil Liberties Advocacy

Objective: Discuss press freedom issues using civil liberties vocabulary (e.g., freedom of information, censorship, gag order, investigative journalism, source protection).

Instructions: Draft a statement opposing judicial restrictions on investigative reporting.

Task Prompt: Task: Argue against a court gag order preventing publication of environmental hazard data.

Expected Output: Output: 'Imposing a blanket gag order on investigative journalists investigating chemical spill hazards infringes upon statutory freedom of information rights. Protecting confidential sources is essential to ensuring corporate accountability in public health matters.'

Activity #28: Evaluating Immigration Policy & Humanitarian Crises

CEFR: C2 | Mastery

Skill / Subskill: Writing — Demographic, asylum & policy terminology

Activity Type: Humanitarian Policy Memo

Objective: Construct balanced policy briefs on migration dynamics using humanitarian vocabulary (e.g., asylum seeker, refugee status, border protocol, demographic shift).

Instructions: Draft a municipal policy memo addressing emergency housing for displaced persons.

Task Prompt: Task: Recommend expanding temporary shelter infrastructure while streamlining asylum processing.

Expected Output: Output: 'Addressing the recent influx of asylum seekers requires a dual policy approach. Municipal authorities must expand emergency shelter capacity immediately while partnering with federal agencies to streamline legal status processing.'

Activity #29: Drafting Public Health Advisory Bulletins

CEFR: C1 | Advanced

Skill / Subskill: Writing — Epidemiological & public health terminology

Activity Type: Public Health Bulletin

Objective: Write official health announcements using epidemiological phrasing (e.g., containment protocol, contact tracing, transmission rate, herd immunity).

Instructions: Draft a municipal health update during a regional respiratory virus outbreak.

Task Prompt: Task: Instruct the public on preventative measures and reporting protocols for high-risk individuals.

Expected Output: Output: 'In response to rising regional transmission rates, the Public Health Department is reinstituting voluntary indoor masking protocols for high-risk demographics. Healthcare facilities have activated robust contact tracing procedures to contain local transmission clusters.'

Activity #30: Personalized Debate: Civic Duty vs. Personal Liberty

CEFR: C1 | Advanced

Skill / Subskill: Speaking — Philosophical & civic discourse vocabulary

Activity Type: Civic Debate

Objective: Articulate a persuasive position on civic mandates (e.g., mandatory voting, public service) using advanced political philosophy lexicon.

Instructions: Participate in a formal debate on whether civic voting should be mandatory.

Task Prompt: Task: Argue that civic participation is a fundamental duty that validates democratic legitimacy.

Expected Output: Output: 'Democratic legitimacy rests upon universal civic participation. Mandating voter attendance ensures that policy decisions reflect the collective will of the entire electorate rather than well-funded special interest groups, reinforcing the core social contract.'

Module 4: Society, Social Issues & Cultural Trends

Activity #31: Analyzing Socioeconomic Mobility & Wealth Disparity

CEFR: C1 | Advanced

Skill / Subskill: Writing — Sociological & macroeconomic vocabulary

Activity Type: Socioeconomic Policy Analysis

Objective: Evaluate social stratification using sociological terminology (e.g., income inequality, social mobility, safety net, generational wealth, systemic barrier).

Instructions: Draft an policy excerpt analyzing structural barriers to higher education.

Task Prompt: Task: Explain how rising tuition rates perpetuate generational wealth disparities.

Expected Output: Output: 'Escalating higher education costs create severe systemic barriers for low-income households, restricting upward social mobility. Without robust financial safety nets, student loan debt perpetuates generational wealth disparities across urban demographics.'

Activity #32: Spotlight: Urban Gentrification & Community Displacement

CEFR: C2 | Mastery

Skill / Subskill: Writing — Urban planning & demographic lexicon

Activity Type: Urban Planning Evaluation

Objective: Discuss urban transformation using planning vocabulary (e.g., gentrification, affordable housing, displacement, urban renewal, zoning regulations).

Instructions: Evaluate the impact of high-tech corridor expansion on historical neighborhoods.

Task Prompt: Task: Contrast commercial urban renewal with the displacement of long-term residents.

Expected Output: Output: 'While the expansion of the technology corridor has spearheaded commercial urban renewal, it has simultaneously triggered rapid gentrification. Strict revisions to municipal zoning regulations are urgently required to preserve affordable housing and prevent residential displacement.'

Activity #33: Evaluating Modern Family Structures & Demographic Trends

CEFR: C1 | Advanced

Skill / Subskill: Writing — Demographic & social history terms

Activity Type: Demographic Trend Analysis

Objective: Analyze shifting household dynamics using demographic vocabulary (e.g., declining birth rate, aging population, nuclear family, multi-generational household).

Instructions: Write a demographic report summary on healthcare planning for an aging population.

Task Prompt: Task: Discuss the economic impact of declining birth rates coupled with increased longevity.

Expected Output: Output: 'A sustained decline in birth rates alongside increased life expectancy is rapidly accelerating the aging population demographic. Public pension funds and healthcare infrastructure must adapt to support an expanding multi-generational eldercare burden.'

Activity #34: Spotlight: Digital Culture, Social Media & Mental Health

CEFR: C2 | Mastery

Skill / Subskill: Speaking/Writing — Media psychology & digital culture terms

Activity Type: Digital Culture Essay

Objective: Incorporate digital culture vocabulary (e.g., echo chamber, doomscrolling, digital detox, algorithmic bias, online polarization) in social essays.

Instructions: Deliver a presentation opening on the psychological impacts of algorithmic content curation.

Task Prompt: Task: Explain how algorithmic engagement loops foster online polarization and anxiety.

Expected Output: Output: 'Modern social media platforms utilize algorithmic curation designed to maximize user engagement, frequently trapping individuals in digital echo chambers. Constant exposure to outrage-inducing content fuels widespread doomscrolling and exacerbates adolescent anxiety metrics.'

Activity #35: Analyzing Educational Reform & Standardized Testing

CEFR: C1 | Advanced

Skill / Subskill: Writing — Pedagogical policy & assessment terms

Activity Type: Pedagogical Policy Op-Ed

Objective: Assess educational models using pedagogical vocabulary (e.g., holistic evaluation, standardized testing, rote learning, curriculum reform, cognitive development).

Instructions: Draft an op-ed excerpt advocating a shift from standardized testing to portfolio assessment.

Task Prompt: Task: Argue that over-reliance on standardized testing fosters rote learning over critical thinking.

Expected Output: Output: 'Over-reliance on high-stakes standardized testing reduces complex cognitive development to mechanical rote learning. Comprehensive curriculum reform must prioritize holistic evaluation methods that measure critical inquiry and creative problem-solving.'

Activity #36: Evaluating Gender Parity & Workplace Equality

CEFR: C2 | Mastery

Skill / Subskill: Writing — Gender studies & corporate policy vocabulary

Activity Type: Corporate Diversity Audit

Objective: Examine workplace equity using diversity vocabulary (e.g., gender pay gap, glass ceiling, parental leave policy, pay transparency, equitable representation).

Instructions: Write a corporate diversity audit report evaluating executive promotion pipelines.

Task Prompt: Task: Detail how invisible barriers prevent qualified women from reaching C-suite positions.

Expected Output: Output: 'Despite robust entry-level recruitment, an unacknowledged glass ceiling continues to limit female advancement into executive leadership. Mandatory pay transparency and structured parental leave policies are critical to establishing equitable representation at the board level.'

Activity #37: Spotlight: Consumerism, Sustainability & Fast Fashion

CEFR: C1 | Advanced

Skill / Subskill: Writing — Environmental economics & consumer behavior lexicon

Activity Type: Sustainability Advocacy

Objective: Critique modern consumer habits using sustainability terms (e.g., planned obsolescence, carbon footprint, fast fashion, circular economy, greenwashing).

Instructions: Draft a consumer advocacy report on corporate environmental claims.

Task Prompt: Task: Expose how superficial sustainable marketing conceals planned obsolescence in consumer electronics.

Expected Output: Output: 'Many consumer electronics manufacturers engage in deceptive greenwashing, touting recyclable packaging while manufacturing devices built on planned obsolescence. True environmental stewardship requires transitioning to a circular economy model with repairable product architectures.'

Activity #38: Analyzing Criminal Justice Reform & Rehabilitation

CEFR: C2 | Mastery

Skill / Subskill: Writing — Penal policy & legal reform vocabulary

Activity Type: Penal Reform Proposal

Objective: Discuss penal policy using criminal justice vocabulary (e.g., recidivism rate, penal reform, restorative justice, mandatory minimums, rehabilitation).

Instructions: Formulate a policy recommendation for juvenile justice reform.

Task Prompt: Task: Advocate replacing punitive incarceration with community-based restorative justice programs.

Expected Output: Output: 'Relying on punitive incarceration and rigid mandatory minimums consistently yields high recidivism rates among young offenders. Transitioning to community-based restorative justice programs prioritizes genuine rehabilitation and constructive social reintegration.'

Activity #39: Evaluating Cultural Heritage Preservation & Tourism

CEFR: C1 | Advanced

Skill / Subskill:Writing — Cultural resource management terms

Activity Type:Heritage Conservation Note

Objective: Examine heritage conservation using cultural preservation terms (e.g., overtourism, heritage site, cultural commodification, restoration, sustainable tourism).

Instructions: Draft a UNESCO advisory note regarding historic city centers.

Task Prompt: Task: Warn against overcrowding and commercialization in historic Mediterranean ports.

Expected Output: Output: 'Unregulated overtourism in Mediterranean historic ports has resulted in severe infrastructure strain and cultural commodification. Municipal authorities must enforce sustainable tourism quotas to protect fragile heritage sites from irreversible degradation.'

Activity #40: Personalized Reflection: Cultural Identity & Globalization

CEFR: C1 | Advanced

Skill / Subskill:Speaking — Sociocultural identity & globalization terms

Activity Type:Cultural Identity Speech

Objective: Articulate personal perspectives on cultural adaptation using globalization lexicon (e.g., cultural assimilation, diaspora, bicultural identity, global homogenization).

Instructions: Present a personal reflection on maintaining heritage traditions within a globalized city.

Task Prompt: Task: Describe how living in a multicultural metropolis reshaped your understanding of cultural identity.

Expected Output: Output: 'Navigating life within a globalized metropolis transformed my view of heritage from static tradition to dynamic expression. Embracing a bicultural identity allows me to honor ancestral customs while actively participating in a broader, globalized civic dialogue.'

Module 5: Technology, Innovation, Science & Environment

Activity #41: Analyzing Artificial Intelligence & Algorithmic Ethics

CEFR: C1 | Advanced

Skill / Subskill:Writing — AI, data science & ethical technology terms

Activity Type:AI Governance Summary

Objective: Critique autonomous systems using AI ethics vocabulary (e.g., algorithmic bias, machine learning, data privacy, automated decision-making, explainable AI).

Instructions: Write an executive summary of an AI governance framework for loan approvals.

Task Prompt: Task: Require auditing machine learning models to prevent discriminatory credit scoring.

Expected Output: Output: 'Deploying machine learning models in credit underwriting demands continuous auditing to eliminate embedded algorithmic bias. Financial institutions must implement explainable AI frameworks to guarantee transparency and regulatory compliance in automated loan decisions.'

Activity #42: Spotlight: Climate Mitigation & Renewable Energy Transition

CEFR: C2 | Mastery

Skill / Subskill: Writing — Climate science & green technology terms

Activity Type: Climate Policy Roadmap

Objective: Evaluate climate policy using environmental science terms (e.g., carbon neutrality, grid storage, decarbonization, fossil fuel divestment, climate resilience).

Instructions: Formulate a state energy roadmap for achieving zero net emissions by 2040.

Task Prompt: Task: Detail the phase-out of coal plants alongside investments in utility-scale grid storage.

Expected Output: Output: 'Achieving complete decarbonization by 2040 requires accelerating fossil fuel divestment and decommissioning legacy coal infrastructure. Concurrently, public capital must subsidize utility-scale grid storage solutions to integrate variable solar and wind generation.'

Activity #43: Evaluating Biotechnology & Genetic Engineering Ethics

CEFR: C1 | Advanced

Skill / Subskill: Writing — Bioethics & genomic technology terms

Activity Type: Bioethics Evaluation

Objective: Discuss bioethical dilemmas using biotechnology vocabulary (e.g., gene editing, CRISPR technology, bioethics, genetic manipulation, clinical trial).

Instructions: Draft an ethics board evaluation for human germline gene editing research.

Task Prompt: Task: Recommend prohibiting heritable genetic modifications until safety and ethical standards are established.

Expected Output: Output: 'While CRISPR gene editing holds immense therapeutic promise for somatic disorders, germline genetic manipulation introduces grave bioethical concerns. The board recommends maintaining a moratorium on heritable modifications until long-term safety profiles are rigorously validated.'

Activity #44: Spotlight: Cybersecurity Vulnerabilities & Data Privacy

CEFR: C2 | Mastery

Skill / Subskill: Speaking/Writing — Information security & risk management
lexicon

Activity Type: Cybersecurity Threat Briefing

Objective: Incorporate cybersecurity vocabulary (e.g., ransomware attack, zero-day vulnerability, end-to-end encryption, breach mitigation, phishing) in threat assessments.

Instructions: Deliver an IT security briefing to a corporate board following a ransomware attempt.

Task Prompt: Task: Detail how a zero-day vulnerability was exploited and recommend upgrading to zero-trust architecture.

Expected Output: Output: 'The recent intrusion attempt leveraged a previously unknown zero-day vulnerability in our legacy VPN server. Although end-to-end encryption prevented data exfiltration, we must immediately transition our corporate network to a zero-trust architecture to prevent future ransomware vectors.'

Activity #45: Evaluating Space Exploration & Commercialization

CEFR: C1 | Advanced

Skill / Subskill: Writing — Aerospace & orbital commercialization terms

Activity Type: Space Policy Proposal

Objective: Assess space policy using aerospace vocabulary (e.g., orbital debris, satellite constellation, space commercialization, extra-terrestrial resource, space law).

Instructions: Draft an international treaty proposal on satellite orbital sustainability.

Task Prompt: Task: Address the risk of space junk collisions caused by mega satellite constellations.

Expected Output: Output: 'The rapid commercialization of low-Earth orbit via private satellite constellations has dramatically elevated the risk of catastrophic space junk collisions. International space law must establish mandatory de-orbiting protocols to preserve orbital sustainability.'

Activity #46: Analyzing Quantum Computing & Technological Disruption

CEFR: C2 | Mastery

Skill / Subskill: Writing — Quantum technology & computing paradigms

Activity Type: Tech Foresight Memo

Objective: Evaluate emerging technologies using advanced computing terms (e.g., quantum supremacy, post-quantum cryptography, processing capacity, technological disruption).

Instructions: Write a technology foresight memo for a financial institution's chief information officer.

Task Prompt: Task: Warn that quantum processing will render current RSA encryption obsolete.

Expected Output: Output: 'Achieving quantum supremacy poses an unprecedented threat to global banking security by threatening to render standard RSA encryption obsolete. The technology department must initiate a multi-year migration strategy toward post-quantum cryptography immediately.'

Activity #47: Spotlight: Circular Economy & Industrial Ecology

CEFR: C1 | Advanced

Skill / Subskill: Writing — Sustainable engineering & waste management terms

Activity Type: Industrial Ecology Guidelines

Objective: Detail sustainable manufacturing using industrial ecology terms (e.g., life-cycle assessment, cradle-to-cradle, industrial symbiosis, zero-waste, eco-design).

Instructions: Draft an operational guidelines document for a manufacturing plant.

Task Prompt: Task: Require life-cycle assessments for all raw materials to achieve zero-waste output.

Expected Output: Output: 'All manufacturing divisions must conduct comprehensive life-cycle assessments for incoming raw materials. Adopting cradle-to-cradle eco-design principles will enable us to repurpose production byproducts and achieve certified zero-waste operational status.'

Activity #48: Evaluating E-Waste & Global Technology Pollution

CEFR: C2 | Mastery

Skill / Subskill: Writing — Environmental hazard & electronic waste terms **Activity Type:** E-Waste Legislative Proposal

Objective: Assess electronic pollution using environmental hazard terms (e.g., electronic waste, heavy metal contamination, informal recycling, extended producer responsibility).

Instructions: Draft a legislative proposal mandating electronic manufacturer recycling programs.

Task Prompt: Task: Propose extended producer responsibility laws to prevent toxic heavy metal leaching in landfills.

Expected Output: Output: 'Inadequate disposal of consumer electronics results in severe heavy metal contamination in municipal watersheds. Enacting extended producer responsibility legislation mandates that manufacturers fund domestic e-waste collection and safe component recycling.'

Activity #49: Evaluating Autonomous Vehicles & Transport Infrastructure

CEFR: C1 | Advanced

Skill / Subskill: Writing — Automated transportation & urban mobility lexicon **Activity Type:** Autonomous Transit Report

Objective: Analyze transport automation using mobility vocabulary (e.g., autonomous vehicle, sensor fusion, V2X communication, mobility-as-a-service, liability framework).

Instructions: Draft a municipal transportation report on integrating driverless transit fleets.

Task Prompt: Task: Outline necessary infrastructure updates including V2X communication nodes and clear liability rules.

Expected Output: Output: 'Integrating autonomous transit vehicles into municipal fleets requires upgrading urban corridors with V2X communication sensors. Simultaneously, city legal teams must coordinate with state regulators to establish clear civil liability frameworks for automated transport accidents.'

Activity #50: Personalized Vision: Technology & Human Flourishing in 2050

CEFR: C1 | Advanced

Skill / Subskill: Speaking — Futurology & techno-philosophical terms **Activity Type:** Futurology Keynote

Objective: Present a vision of future technological integration using futurology vocabulary (e.g., human augmentation, technological singularity, sustainable automation, digital ethics).

Instructions: Deliver a 2-minute keynote address on balancing technological automation with human-centric values.

Task Prompt: Task: Envision a future where AI automates routine labor while enhancing human creative potential.

Expected Output: Output: 'By 2050, the true measure of technological progress will not be processing speed, but human flourishing. As sustainable automation relieves humanity of routine cognitive and manual labor, digital ethics frameworks must ensure these productivity gains liberate human creative and scientific potential.'

Module 6: Arts, Literature, Entertainment & Aesthetic Critique

Activity #51: Drafting Film & Visual Media Critiques

CEFR: C1 | Advanced

Skill / Subskill: Writing — Cinematography & visual narrative lexicon

Activity Type: Film Critique Writing

Objective: Critique visual storytelling using film studies vocabulary (e.g., mise-en-scène, avant-garde, non-linear narrative, thematic motif, auteur).

Instructions: Write a 150-word film review of an art-house psychological thriller.

Task Prompt: Task: Evaluate how the director's use of claustrophobic lighting mirrors the protagonist's mental decline.

Expected Output: Output: 'The director's auteur vision is fully realized through a masterful manipulation of mise-en-scène and chiaroscuro lighting. Set within an isolated brutalist structure, the claustrophobic visual composition directly mirrors the protagonist's descending psychic stability, elevating a simple thriller into an avant-garde character study.'

Activity #52: Spotlight: Literary Criticism & Narrative Devices

CEFR: C2 | Mastery

Skill / Subskill: Writing — Literary analysis & narrative mechanics terms

Activity Type: Literary Criticism Essay

Objective: Deconstruct literary prose using critical analysis terms (e.g., unreliable narrator, allegorical structure, foreshadowing, catharsis, stream-of-consciousness).

Instructions: Write a critical essay excerpt analyzing a modern novel's narrative technique.

Task Prompt: Task: Discuss how an unreliable narrator creates ambiguity regarding historical events.

Expected Output: Output: 'By employing a distinctly unreliable narrator, the novel dismantles the illusion of objective historical memory. The stream-of-consciousness prose is laden with subtle allegorical structures, forcing the reader to constantly question the veracity of key recollections.'

Activity #53: Evaluating Architecture & Urban Aesthetic Identity

CEFR: C1 | Advanced

Skill / Subskill: Writing — Architectural theory & spatial design terms

Activity Type: Architectural Design Review

Objective: Assess spatial design using architectural terms (e.g., brutalism, sustainable architecture, spatial harmony, facade, adaptive reuse).

Instructions: Draft an architecture magazine review of a converted industrial warehouse.

Task Prompt: Task: Praise the adaptive reuse of a 19th-century brick factory into a public cultural center.

Expected Output: Output: 'This project stands as a triumph of adaptive reuse, seamlessly blending historical industrial facades with modern sustainable architecture. The soaring brick interior achieves remarkable spatial harmony, transforming a former textile mill into a vibrant public art sanctuary.'

Activity #54: Spotlight: Performing Arts & Stage Production Analysis

CEFR: C2 | Mastery

Skill / Subskill: Writing — Theatrical & performing arts vocabulary

Activity Type: Theatre Review Writing

Objective: Evaluate live theatre performances using theatrical terminology (e.g., dramatic tension, choreography, stagecraft, acoustic design, bravura performance).

Instructions: Write a theatre review covering an avant-garde opera adaptation.

Task Prompt: Task: Evaluate the lead soprano's vocal performance alongside minimalist stage design.

Expected Output: Output: 'The production's minimalist stagecraft relied heavily on stark lighting and pristine acoustic design to heighten dramatic tension. The lead soprano delivered a bravura performance, navigating complex avant-garde vocal arrangements with effortless technical precision.'

Activity #55: Formulating Art Exhibition Curatorial Statements

CEFR: C1 | Advanced

Skill / Subskill: Writing — Curatorial theory & visual art vocabulary

Activity Type: Curatorial Statement

Objective: Write gallery curatorial notes using art theory phrasing (e.g., retrospective, juxtaposition, evocative imagery, tactile medium, aesthetic discourse).

Instructions: Draft a curatorial introduction for a modern sculpture exhibition.

Task Prompt: Task: Describe an exhibition exploring the contrast between natural stone and synthetic industrial resin.

Expected Output: Output: 'This retrospective brings together three decades of sculpture exploring the tension between organic geology and synthetic polymer. Through the striking juxtaposition of rough granite and translucent resin, the exhibition initiates a compelling aesthetic discourse on environmental transformation.'

Activity #56: Evaluating Music Theory & Compositional Innovation

CEFR: C2 | Mastery

Skill / Subskill: Writing — Musicology & sound criticism vocabulary

Activity Type: Musicology Critique

Objective: Analyze musical arrangements using musicology vocabulary (e.g., polyphonic texture, dissonance, thematic leitmotif, orchestral arrangement, avant-garde composition).

Instructions: Write a music critique evaluating a contemporary classical symphony.

Task Prompt: Task: Discuss how controlled dissonance and polyphonic brass textures convey urban chaos.

Expected Output: Output: 'The composer's third movement utilizes dense polyphonic textures and jarring brass dissonance to evoke the relentless momentum of modern urban life. Rerecurring woodwind leitmotifs offer fleeting moments of melodic relief before dissolving back into complex orchestral turmoil.'

Activity #57: Spotlight: Cultural Heritage Restoration & Conservation Ethics

CEFR: C1 | Advanced

Skill / Subskill: Writing — Art conservation & restoration terms

Activity Type: Art Conservation Report

Objective: Discuss art conservation ethics using preservation vocabulary (e.g., provenance, authenticity, restoration protocol, structural degradation, repatriation).

Instructions: Draft a museum committee report on restoring a damaged Renaissance painting.

Task Prompt: Task: Recommend non-invasive stabilization while researching disputed historical ownership.

Expected Output: Output: 'Prior to undertaking physical restoration protocols on the Renaissance canvas, conservators must stabilize severe paint flaking using non-invasive techniques. Simultaneously, the legal committee must conduct a thorough provenance review to resolve unresolved repatriation claims.'

Activity #58: Analyzing Literary Translation & Cultural Adaptation

CEFR: C2 | Mastery

Skill / Subskill: Writing — Translation theory & linguistic fidelity terms

Activity Type: Translation Critique Essay

Objective: Assess literary translations using translation studies vocabulary (e.g., linguistic fidelity, target language register, localization, idiomatic equivalence, loss in translation).

Instructions: Write a comparative review evaluating two English translations of a Japanese novel.

Task Prompt: Task: Contrast literal word-for-word translation with culturally adapted idiomatic translation.

Expected Output: Output: 'While the 1982 translation prioritizes strict linguistic fidelity, it frequently results in stiff, unnatural prose in English. The recent 2024 edition achieves brilliant idiomatic equivalence, preserving the author's subtle poetic cadence through sensitive target language register calibration.'

Activity #59: Evaluating Culinary Arts & Gastronomic Innovation

CEFR: C1 | Advanced

Skill / Subskill: Writing — Gastronomy & culinary critique vocabulary

Activity Type: Gastronomic Review

Objective: Review fine dining experiences using culinary studies vocabulary (e.g., gastronomy, sensory profile, deconstructed dish, artisanal sourcing, avant-garde cuisine).

Instructions: Write a restaurant critique for a Michelin-starred farm-to-table establishment.

Task Prompt: Task: Evaluate a deconstructed seafood dish emphasizing hyper-local artisanal ingredients.

Expected Output: Output: 'The chef's tasting menu demonstrates a flawless mastery of modern gastronomy, highlighted by a deconstructed sea bass pairing. Incorporating hyper-local artisanal ingredients, the dish presents a sophisticated sensory profile that elevates humble coastal traditions.'

Activity #60: Personalized Aesthetic Review: An Artwork That Shaped My Perspective

CEFR: C1 | Advanced

Skill / Subskill: Speaking — Personal aesthetic commentary & art appreciation terms

Activity Type: Personal Aesthetic Commentary

Objective: Deliver a 2-minute personal commentary analyzing how a specific piece of art, music, or literature influenced your intellectual worldview.

Instructions: Present a personal commentary on an architectural masterpiece or transformative book.

Task Prompt: Task: Explain how reading a specific dystopian novel altered your perspective on technological privacy.

Expected Output: Output: 'Encountering Orwell's classic during my formative years fundamentally altered my perception of state surveillance and data privacy. Its vivid depiction of psychological control through language normalization instilled in me a lifelong commitment to defending civil liberties in our digital age.'

Module 7: Idiomatic Expressions, Phrasal Verbs & Metaphorical Lexicon

Activity #61: Upgrading Phrasal Verbs in Executive Correspondence

CEFR: C1 | Advanced

Skill / Subskill: Writing — Formal Latinate verb conversion

Activity Type: Latinate Register Upgrade

Objective: Replace multi-word phrasal verbs with precise single-word Latinate equivalents in business letters (e.g., blow up → inflate/explode, look into → investigate, bring about → cause).

Instructions: Upgrade an informal internal audit summary into formal corporate prose.

Task Prompt: Task: Rephrase: 'We need to look into why costs went up and put off the launch until we sort out these issues.'

Expected Output: Output: 'We must investigate the factors precipitating cost increases and defer the product launch until we resolve these operational discrepancies.'

Activity #62: Spotlight: Corporate Idioms in High-Stakes Negotiations

CEFR: C2 | Mastery

Skill / Subskill: Speaking/Writing — Business & negotiation idiomatic expressions

Activity Type: Negotiation Status Update

Objective: Incorporate advanced business idioms (e.g., move the goalposts, ball is in their court, level playing field, touch base, read between the lines) in strategic updates.

Instructions: Draft a memo summarizing the status of acquisition talks after a counter-offer.

Task Prompt: Task: Explain that the seller changed conditions and the burden of response is now on us.

Expected Output: Output: 'By raising the valuation requirement late in negotiations, the seller has effectively moved the goalposts. The ball is now in our court to determine whether to accept the revised terms or walk away from the table.'

Activity #63: Deconstructing Metaphors of Light, Darkness & Vision

CEFR: C1 | Advanced

Skill / Subskill: Writing — Cognitive metaphor & rhetorical imagery

Activity Type: Rhetorical Metaphor Essay

Objective: Utilize light/darkness/vision metaphors (e.g., shed light on, blind spot, murky waters, visionary approach, overshadow) in editorial writing.

Instructions: Write an op-ed paragraph analyzing a government financial scandal.

Task Prompt: Task: Detail how an independent audit revealed hidden transactions and cast doubt on official reports.

Expected Output: Output: 'The forensic audit has finally shed light on years of murky financial transactions previously hidden from public oversight. These alarming disclosures overshadow the administration's claims of fiscal integrity, exposing critical blind spots in regulatory enforcement.'

Activity #64: Spotlight: Three-Part Phrasal Verbs in Professional Conflict

CEFR: C2 | Mastery

Skill / Subskill: Speaking — Complex multi-word phrasal verbs

Activity Type: HR Conflict Roleplay

Objective: Deploy three-part phrasal verbs (e.g., come up against, clamp down on, face up to, look down on, cut down on) in HR mediation sessions.

Instructions: Roleplay an HR advisory statement addressing manager-employee friction.

Task Prompt: Task: Advise a department manager to confront performance issues without appearing patronizing.

Expected Output: Output: 'Management must face up to ongoing productivity lapses without giving staff the impression that leadership looks down on them. Clamping down on tardiness requires constructive dialogue rather than punitive decrees.'

Activity #65: Deconstructing Water, Flow & Fluid Dynamic Metaphors

CEFR: C1 | Advanced

Skill / Subskill: Writing — Fluid dynamic metaphors in economic reporting

Activity Type: Financial Market Reporting

Objective: Incorporate fluid dynamic metaphors (e.g., liquidity freeze, trickle-down, stem the tide, surge, volatile wave) in financial journalism.

Instructions: Draft a market analysis paragraph describing a banking liquidity crisis.

Task Prompt: Task: Describe a sudden drop in credit flow and government efforts to stabilize the market.

Expected Output: Output: 'Central bank intervention was urgently required to stem the tide of panic following a sudden liquidity freeze across interbank lending channels. Without immediate capital injections, a wave of insolvency threatened to engulf mid-tier regional lenders.'

Activity #66: Spotlight: Idiomatic Expressions of Time & Urgency

CEFR: C2 | Mastery

Skill / Subskill: Writing — Time-related idioms & precision expressions

Activity Type: Project Post-Mortem

Objective: Incorporate time idioms (e.g., down to the wire, in the nick of time, against the clock, eleventh hour, turn of the century) in project debriefs.

Instructions: Write a project manager's post-mortem on a high-pressure software release.

Task Prompt: Task: Describe completing a critical bug fix right before the midnight deployment deadline.

Expected Output: Output: 'Resolving the critical database vulnerability went right down to the wire, with our engineering team working frantically against the clock. An eleventh-hour patch deployed in the nick of time enabled us to meet the mandatory midnight deployment deadline.'

Activity #67: Deconstructing Fire, Heat & Explosion Metaphors

CEFR: C1 | Advanced

Skill / Subskill: Writing — Conflict & thermal metaphors in political analysis

Activity Type: Political News Summary

Objective: Utilize fire/heat metaphors (e.g., heated debate, fuel the flames, spark outrage, burnt out, add fuel to the fire) in political reporting.

Instructions: Draft a news summary covering a parliamentary debate on fuel subsidies.

Task Prompt: Task: Describe how controversial comments by a minister intensified an already angry debate.

Expected Output: Output: 'The minister's ill-considered remarks served only to fuel the flames of an already heated parliamentary debate over subsidy reductions. His comments sparked widespread public outrage, triggering immediate calls for a formal vote of no confidence.'

Activity #68: Spotlight: Idiomatic Expressions of Success, Failure & Risk

CEFR: C2 | Mastery

Skill / Subskill: Speaking/Writing — Risk & outcome idiomatic expressions

Activity Type: Venture Capital Debrief

Objective: Deploy outcome idioms (e.g., hit a brick wall, dodge a bullet, play with fire, back to square one, smooth sailing) in startup debriefs.

Instructions: Evaluate a venture capital investment in a failed tech startup.

Task Prompt: Task: Explain how ignoring regulatory warnings resulted in complete failure, forcing a restart.

Expected Output: Output: 'By launching the platform without regulatory clearance, the founders were playing with fire. The subsequent injunction forced the enterprise to hit a brick wall, leaving investors back to square one after burning through \$10 million in seed capital.'

Activity #69: Deconstructing Architectural & Structural Metaphors

CEFR: C1 | Advanced

Skill / Subskill: Writing — Building & structural metaphors in organizational design

Activity Type: Corporate Strategy Blueprint

Objective: Apply structural metaphors (e.g., foundational pillar, blueprint, crumbling infrastructure, cemented position, cornerstone) in corporate planning.

Instructions: Draft an executive strategy document outlining corporate core values.

Task Prompt: Task: Describe customer trust as the central support of company growth.

Expected Output: Output: 'Uncompromising data integrity represents the foundational pillar of our corporate expansion strategy. Maintaining customer trust is the cornerstone of our brand identity, serving as the architectural blueprint for all future technology developments.'

Activity #70: Personalized Idiomatic Storytelling: Overcoming Professional Adversity

CEFR: C1 | Advanced

Skill / Subskill: Speaking — Integrated idiomatic storytelling & personal narrative

Activity Type: Personal Narrative

Objective: Narrate a 2-minute personal anecdote describing a professional challenge using at least four advanced idioms and phrasal verbs naturally.

Instructions: Share a story about turning around a failing project at work.

Task Prompt: Task: Describe taking over a troubled project, addressing staff burnout, and delivering success against the odds.

Expected Output: Output: 'When I took over Project Apex, the team was completely burnt out and running on empty. We had hit a brick wall with our primary vendor, but rather than throwing in the towel, we faced up to the technical debt. Working against the clock, we overhauled the system architecture and delivered a resounding success down to the wire.'

Module 8: Academic Register, Abstract Nouns & Formal Expressions

Activity #71: Abstract Noun Nominalization in Policy Analysis

CEFR: C1 | Nominalization
Conversion

Skill / Subskill: Writing — Nominalization for formal objectivity

Activity Type: Production Task

Objective: Convert verb-heavy clauses into dense abstract noun phrases to achieve formal academic impersonality.

Instructions: Nominalize: 'Because the government failed to regulate the banking sector effectively, the economy collapsed rapidly.'

Task Prompt: Output: 'The ineffective governmental regulation of the banking sector precipitated a rapid economic collapse.'

Expected Output: Advanced

Activity #72: Spotlight: Evaluative Adjectives in Peer Review Critiques

CEFR: C2 | Mastery

Skill / Subskill: Writing — Precision in academic commentary

Activity Type: Peer Review Writing

Objective: Deploy evaluative adjectives (e.g., tenuous, rigorous, meticulous, flawed, compelling) in peer review evaluations.

Instructions: Write a 2-sentence critique evaluating a research paper's methodology and conclusions.

Task Prompt: Task: Praise the data collection while critiquing the theoretical foundation as weak.

Expected Output: Output: 'While the author's empirical data collection is undeniably meticulous, the theoretical foundation supporting the final conclusion remains distinctly tenuous.'

Activity #73: Formal Prepositional Locutions in Legal Notices

CEFR: C2 | Mastery

Skill / Subskill: Writing — Complex prepositional phrases in formal contexts

Activity Type: Legal Drafting

Objective: Utilize formal prepositional phrases (e.g., in accordance with, notwithstanding, on behalf of, in light of, with reference to) in legal correspondence.

Instructions: Draft a formal breach-of-contract notice incorporating three complex prepositional phrases.

Task Prompt: Task: Notify a vendor of contract termination due to persistent non-performance despite prior warnings.

Expected Output: Output: 'In accordance with Clause 8B, and notwithstanding previous grace periods granted on behalf of the directorate, notice is hereby given of immediate contract termination in light of persistent non-performance.'

Activity #74: Spotlight: Discourse Connectives in Policy Debates

CEFR: C1 | Advanced

Skill / Subskill: Speaking/Writing — Formal cohesive transition markers

Activity Type: Debate Cohesion

Objective: Use advanced discourse connectives (e.g., consequently, conversely, furthermore, notwithstanding, in contrast) in oral arguments.

Instructions: Connect two contrasting policy impacts during a debate simulation.

Task Prompt: Task: Contrast short-term tax revenue gains with long-term capital flight risks.

Expected Output: Output: 'The proposed transaction tax promises immediate revenue generation for public infrastructure; conversely, it risks driving institutional capital into offshore jurisdictions over the long term.'

Activity #75: Hedging & Cautious Expressivity in Scientific Conclusions

CEFR: C1 | Advanced

Skill / Subskill: Writing — Epistemic hedging in academic prose

Activity Type: Academic Hedging

Objective: Calibrate claims using hedging verbs, adverbs, and modal adjectives (e.g., indicate, tend to, conceivably, preliminary evidence suggests) to avoid over-generalization.

Instructions: Rewrite an overconfident scientific claim into hedged academic language.

Task Prompt: Task: Rephrase: 'This drug completely cures Alzheimer's disease in all patients.'

Expected Output: Output: 'Preliminary clinical trials suggest that this pharmaceutical compound may attenuate cognitive decline in patients diagnosed with early-stage Alzheimer's disease.'

Activity #76: Spotlight: Advanced Verbs of Attribution & Citation

CEFR: C2 | Mastery

Skill / Subskill: Writing — Scholarly citation & attribution verbs

Activity Type: Literature Review Synthesis

Objective: Utilize precise attribution verbs (e.g., posit, refute, concede, corroborate, substantiate) in literature reviews.

Instructions: Synthesize two contrasting scholarly viewpoints on tariff policy.

Task Prompt: Task: Cite Author A who argues tariffs protect jobs and Author B who shows tariffs increase consumer costs.

Expected Output: Output: 'While Thorne (2021) posits that protective tariffs safeguard domestic manufacturing employment, modern empirical data presented by Vance (2023) refutes this claim, demonstrating that such levies ultimately elevate consumer goods prices.'

Activity #77: Formulating Formal Definitions in Technical Manuals

CEFR: C1 | Advanced

Skill / Subskill: Writing — Aristotelian definition architecture

Activity Type: Technical Definition Drafting

Objective: Construct formal academic definitions consisting of Item + General Class + Distinguishing Characteristics.

Instructions: Draft a formal definition of 'blockchain technology' for an executive briefing.

Task Prompt: Task: Define blockchain as a decentralized digital ledger that records encrypted transactions across a distributed network.

Expected Output: Output: 'Blockchain is a decentralized digital ledger system characterized by cryptographically secured transaction records distributed across an immutable peer-to-peer network.'

Activity #78: Spotlight: Stance Adverbs in Executive Summaries

CEFR: C2 | Mastery

Skill / Subskill: Writing — Attitudinal & stance adverbials

Activity Type: Board Summary Writing

Objective: Incorporate stance adverbs (e.g., admittedly, regrettably, indisputably, paradoxical as it may seem, fundamentally) in board summaries.

Instructions: Write a board summary opening acknowledging a strategic miscalculation.

Task Prompt: Task: Acknowledge that despite strong revenue growth, profit margins compressed due to inflation.

Expected Output: Output: 'Indisputably, gross revenue expanded by 18% in FY2024; regrettably, persistent inflationary pressures significantly compressed operating profit margins over the same period.'

Activity #79: Elaborating Complex Cause-and-Effect Relationships

CEFR: C1 | Advanced

Skill / Subskill: Writing — Academic causal expressions

Activity Type: Causal Analysis Writing

Objective: Express complex multi-stage causation using formal causal nouns and verbs (e.g., precipitate, stem from, trigger, give rise to, nexus).

Instructions: Draft a paragraph explaining the causes of systemic banking instability.

Task Prompt: Task: Explain how interest rate hikes triggered real estate devaluations, precipitating bank run risks.

Expected Output: Output: 'Rapid central bank interest rate hikes triggered severe devaluations in commercial real estate portfolios. This asset erosion precipitated widespread depositor panic, giving rise to acute liquidity risks across mid-tier financial institutions.'

Activity #80: Personalized Academic Statement: Research Philosophy

CEFR: C1 | Advanced

Skill / Subskill: Writing — Scholarly self-articulation & academic voice **Activity Type:** Academic Statement

Objective: Draft a 120-word personal statement outlining academic research philosophy and methodological commitment.
Instructions: Write a personal statement for a doctoral program application in environmental economics.
Task Prompt: Task: State your research dedication to empirical data analysis and policy-driven sustainability solutions.
Expected Output: Output: 'My scholarly endeavor is anchored in the rigorous empirical analysis of market-based environmental policy. I posit that resolving ecological crises demands bridging theoretical economic modeling with pragmatic regulatory frameworks. Through meticulous quantitative inquiry, my research aims to elucidate optimal carbon pricing mechanisms that reconcile industrial productivity with long-term ecological resilience.'

Module 9: Collocations, Word Partnerships & Lexical Precision

Activity #81: Upgrading Verb-Noun Collocations in Corporate Reports

CEFR: C1 | Advanced

Skill / Subskill: Writing — High-level corporate verb-noun partnerships **Activity Type:** Collocation Upgrade

Objective: Replace weak verb-noun combinations with formal corporate partnerships (e.g., do research → conduct research, get results → achieve results, make a decision → reach a decision).
Instructions: Upgrade an informal business proposal update.
Task Prompt: Task: Rephrase: 'We did a survey, got good data, and made a decision to start the project.'
Expected Output: Output: 'We conducted an extensive survey, obtained robust data, and reached a definitive decision to initiate the project.'

Activity #82: Spotlight: Adjective-Noun Partnerships in Economic Analysis

CEFR: C2 | Mastery

Skill / Subskill: Writing — Precise economic descriptor collocations **Activity Type:** Economic Commentary

Objective: Deploy advanced adjective-noun collocations (e.g., rampant inflation, volatile market, negligible impact, unprecedented growth, stark contrast) in financial reporting.
Instructions: Draft a macroeconomic market commentary on quarterly inflation metrics.
Task Prompt: Task: Describe how rapid price increases stand in sharp contrast to central bank projections.
Expected Output: Output: 'The resurgence of rampant inflation presents a stark contrast to the central bank's optimistic projections. Amid a highly volatile market, monetary authorities face mounting pressure to implement aggressive interest rate adjustments.'

Activity #83: Upgrading Adverb-Adjective Collocations in Critical Reviews

CEFR: C1 | Advanced

Skill / Subskill: Writing — Intensifier-adjective collocations

Activity Type: Editorial Critique Drafting

Objective: Pair precise adverbs with adjectives (e.g., bitterly disappointed, highly controversial, glaringly obvious, deeply flawed, blissfully unaware) in editorial critiques.

Instructions: Draft an editorial critique of a flawed public infrastructure plan.

Task Prompt: Task: Describe a plan whose technical errors are obvious and deeply troubling.

Expected Output: Output: 'The proposed transit expansion relies on glaringly obvious engineering miscalculations. Delivering a deeply flawed architectural blueprint to city council represents a highly irresponsible oversight by municipal planners.'

Activity #84: Spotlight: Verb-Adverb Collocations in Operations Management

CEFR: C2 | Mastery

Skill / Subskill: Writing — Action-manner collocations in business

Activity Type: Executive Directive

Objective: Utilize verb-adverb collocations (e.g., vehemently deny, strictly enforce, unequivocally support, steadily increase, drastically reduce) in executive memos.

Instructions: Draft an executive memo regarding safety protocol enforcement.

Task Prompt: Task: Announce that safety regulations will be strictly enforced and management unequivocally supports compliance.

Expected Output: Output: 'Plant managers will henceforth strictly enforce all regional occupational safety standards. Executive leadership unequivocally supports immediate facility shutdowns in any instance where safety compliance is compromised.'

Activity #85: Deconstructing Legal Binomials & Trinomials

CEFR: C2 | Mastery

Skill / Subskill: Writing — Fixed legal doublets & triplets

Activity Type: Legal Clause Drafting

Objective: Incorporate fixed legal collocations (e.g., terms and conditions, null and void, rules and regulations, full and complete, fit and proper) in formal contracts.

Instructions: Draft a contract clause declaring an agreement invalid upon breach.

Task Prompt: Task: State that failing to meet terms makes the contract completely invalid.

Expected Output: Output: 'Failure to comply with the explicit terms and conditions set forth in Section 4 shall render this agreement null and void with immediate effect.'

Activity #86: Upgrading De-Lexicalized Verbs in Legal Memos

CEFR: C1 | Advanced

Skill / Subskill: Writing — Precision verb replacements for make/do/take/have **Activity Type:** Legal Register Elevation

Objective: Replace de-lexicalized verbs (*make*, *do*, *take*, *have*) with precise legal verbs (e.g., make an argument → advance an argument, do an audit → perform an audit, take action → initiate proceedings).

Instructions: Upgrade a legal counsel summary note.

Task Prompt: Task: Rephrase: 'We should take action against the firm because they made a breach of contract and had no defense.'

Expected Output: Output: 'We ought to initiate legal proceedings against the firm, as they committed a material breach of contract and offered no viable defense.'

Activity #87: Spotlight: Preposition-Noun Collocations in Corporate Risk Memos

CEFR: C1 | Advanced

Skill / Subskill: Writing — Fixed prepositional noun phrases **Activity Type:** Risk Audit Summary

Objective: Utilize fixed prepositional phrases (e.g., under pressure, at risk, in jeopardy, out of compliance, on short notice) in risk management reports.

Instructions: Draft a risk audit finding regarding data server compliance.

Task Prompt: Task: State that backup facilities are out of compliance, putting customer data at risk.

Expected Output: Output: 'Our secondary data center is currently out of compliance with international security standards. Operating without redundant encryption places sensitive customer records at acute risk during power outages.'

Activity #88: Deconstructing Financial Collocations in Earnings Reports

CEFR: C2 | Mastery

Skill / Subskill: Writing — Financial statement terminology partnerships **Activity Type:** Earnings Report Writing

Objective: Deploy financial collocations (e.g., wipe out value, generate revenue, squeeze margins, yield dividends, incur debt) in quarterly summaries.

Instructions: Write a quarterly earnings summary for a retail company.

Task Prompt: Task: Explain how rising supply costs compressed profit margins despite strong revenue generation.

Expected Output: Output: 'Although our e-commerce division continued to generate substantial revenue, surging freight tariffs severely squeezed operating margins, preventing the company from yielding expected quarterly dividends.'

Activity #89: Upgrading Communication Collocations in Diplomatic Reports

CEFR: C1 | Advanced

Skill / Subskill: Writing — High-register speech & negotiation collocations

Activity Type: Diplomatic Update

Objective: Incorporate communication collocations (e.g., break the deadlock, extend an invitation, reach a consensus, voice concerns, issue a joint statement) in diplomatic updates.

Instructions: Summarize the outcome of a bilateral climate summit.

Task Prompt: Task: State that delegates broke the impasse and released a joint agreement.

Expected Output: Output: 'After 36 hours of continuous negotiation, delegates succeeded in breaking the deadlock over carbon offsets. Both nations subsequently issued a joint statement pledging binding emission reduction targets.'

Activity #90: Personalized Collocation Audit: Professional Vocabulary Refinement

CEFR: C1 | Advanced

Skill / Subskill: Writing — Self-editing & collocation auditing

Activity Type: Resume Collocation Audit

Objective: Audit and rewrite a 100-word draft of your own professional resume or summary, replacing at least five weak word pairings with precise, high-level collocations.

Instructions: Refine a generic LinkedIn summary paragraph into polished professional prose.

Task Prompt: Draft: 'I have done work in sales for 10 years. I am good at making teams work together and getting new clients.'

Expected Output: Output: 'Over the past decade, I have cultivated extensive expertise in enterprise sales. I possess a proven track record of fostering cross-functional team collaboration and acquiring high-value institutional clients.'

Module 10: Lexical Auditing, Register Shifts & Discourse Production

Activity #91: Auditing Executive Summaries for Informal Register

CEFR: C1 | Advanced

Skill / Subskill: Writing — Register audit & stylistic elevation

Activity Type: Executive Register Audit

Objective: Identify and replace informal vocabulary, phrasal verbs, and conversational fillers in a corporate report excerpt.

Instructions: Audit and rewrite a draft summary containing conversational leaks.

Task Prompt: Draft: 'Basically, our team looked into the problem and found out that customers are fed up with slow delivery.'

Expected Output: Output: 'Fundamentally, our diagnostic audit revealed that end-users exhibit acute dissatisfaction regarding extended delivery timelines.'

Activity #92: Spotlight: Neutralizing Emotional Bias in Investigative Journalism

CEFR: C2 | Mastery

Skill / Subskill: Writing — Journalistic objectivity & bias elimination

Activity Type: Journalistic Objectivity Audit

Objective: Detect and remove emotionally charged language from an investigative news article, substituting neutral, fact-based terminology.

Instructions: Neutralize a biased news report about a corporate merger.

Task Prompt: Draft: 'The greedy mega-corporation deviously swallowed its smaller rival in a shocking market grab.'

Expected Output: Output: 'The multinational conglomerate successfully acquired its regional competitor, consolidating its market share within the telecommunications sector.'

Activity #93: Transforming Spoken Briefings into Formal Policy Documents

CEFR: C1 | Register Translation

Skill / Subskill: Writing — Spoken-to-written register translation

Activity Type: Production Task

Objective: Convert a transcript of an informal verbal briefing into a formal written policy directive.

Instructions: Transcript: 'Guys, make sure you don't talk to reporters about the data breach until we get our story straight.'

Task Prompt: Output: 'Policy Directive: Personnel are strictly prohibited from issuing statements to media representatives regarding the security incident pending official clearance from the Communications Directorate.'

Expected Output: Advanced

Activity #94: Spotlight: Eliminating Vagueness & Imprecision in Legal Memos

CEFR: C2 | Mastery

Skill / Subskill: Writing — Lexical specificity & precision auditing

Activity Type: Precision Auditing

Objective: Replace vague words (e.g., things, stuff, good, bad, soon, a lot) with precise legal and quantitative terminology.

Instructions: Rewrite a vague legal advice note to a corporate client.

Task Prompt: Draft: 'We need to fix some things in the contract pretty soon or we could lose a lot of money.'

Expected Output: Output: 'We must amend Clauses 3 and 7 of the commercial lease agreement prior to October 15 to mitigate potential financial liabilities exceeding \$500,000.'

Activity #95: Eliminating Redundancy & Tautology in Corporate Communications

CEFR: C1 | Advanced

Skill / Subskill: Writing — Conciseness & tautology removal

Activity Type: Tautology Elimination

Objective: Audit business prose to eliminate redundant pairings (e.g., future plans, end result, unexpected surprise, basic fundamentals, absolute necessity).

Instructions: Edit a redundant corporate announcement paragraph.

Task Prompt: Draft: 'Our future plans require an absolute necessity to combine together both divisions for the final end result.'

Expected Output: Output: 'Our strategy requires consolidating both divisions to achieve the desired outcome.'

Activity #96: Spotlight: Cultivating Nuanced Diplomatic Rejections

CEFR: C2 | Mastery

Skill / Subskill: Speaking/Writing — Diplomatic tact & polite refusal strategies **Activity Type:** Diplomatic Refusal

Objective: Draft formal diplomatic rejections that decline proposals tactfully without severing professional relationships.
Instructions: Refuse a joint venture proposal from an international partner firm.
Task Prompt: Task: Decline the partnership offer citing strategic alignment mismatch while expressing willingness for future dialogue.
Expected Output: Output: 'While we deeply appreciate your detailed joint venture proposal, executive leadership has concluded that the initiative does not fully align with our current operational focus. We remain profoundly grateful for your engagement and welcome future opportunities for strategic dialogue.'

Activity #97: Neutralizing Dysphemisms in Political Commentary

CEFR: C1 | Euphemistic Calibration

Skill / Subskill: Writing — Euphemism & dysphemism calibration **Activity Type:** Production Task

Objective: Identify harsh or dysphemistic phrasing in political commentary and convert it into neutral, respectful analytical language.
Instructions: Rewrite: 'The president's foolish plan is a total disaster that ruins the economy.'
Task Prompt: Output: 'The administration's fiscal policy initiative faces significant criticism regarding its potential to induce macroeconomic instability.'
Expected Output: Advanced

Activity #98: Spotlight: Discourse Signposting in Executive Keynotes

CEFR: C2 | Mastery

Skill / Subskill: Speaking — Oral discourse signposting & rhetorical transitions **Activity Type:** Keynote Signposting

Objective: Incorporate sophisticated oral signposting markers (e.g., turning now to, to illustrate this point, let us examine, in stark contrast) in formal presentations.
Instructions: Draft a 2-minute opening for a keynote address on corporate digital transformation.
Task Prompt: Task: Signpost the transition from legacy challenges to future artificial intelligence integration.
Expected Output: Output: 'Good morning. Having examined the structural limitations of our legacy architecture, turning now to our future strategic direction, I wish to outline how integrating artificial intelligence will revolutionize our operational throughput.'

Activity #99: Auditing Academic Manuscripts for Informal Vocabulary Leaks

CEFR: C1 | Manuscript Register Audit

Skill / Subskill: Writing — Academic manuscript proofreading & register checkActivity Type: Production Task

Objective: Audit a 150-word graduate research paper excerpt, identifying and correcting five informal vocabulary leaks.

Instructions: Audit excerpt: 'This study looks at how kids learn language. We got some neat findings that show that reading a lot helps out big time.'

Task Prompt: Output: 'This study investigates pediatric language acquisition. Our empirical findings demonstrate that extensive reading significantly enhances linguistic development.'

Expected Output: Advanced

Activity #100: Personalized Master Synthesis: Executive Portfolio Presentation

CEFR: C2 | Mastery

Skill / Subskill: Speaking/Writing — Comprehensive C2 lexical mastery synthesisActivity Type: Master Synthesis Portfolio

Objective: Draft a 200-word executive summary for a professional portfolio synthesizing high-level collocations, formal register, abstract nominalizations, and diplomatic phrasing.

Instructions: Write an executive summary presenting your professional trajectory and management philosophy.

Task Prompt: Task: Synthesize 10+ years of operational leadership, highlighting strategic foresight, crisis resilience, and commitment to institutional excellence.

Expected Output: Output: 'Throughout a distinguished 12-year tenure in executive operations, I have consistently demonstrated strategic foresight and operational agility across volatile global markets. My leadership paradigm is anchored in the scrupulous alignment of corporate governance with innovative human capital development. By precipitating organizational efficiency and navigating high-stakes crises with composure, I have successfully steered enterprise expansions yielding sustainable profitability. Indisputably, cultivating cross-functional cohesion and fostering an institutional culture of uncompromising excellence represent the cornerstones of my professional philosophy.'
