

100 ADVANCED (C1–C2) ENGLISH ACTIVITIES

Grounded in *Longman Academic Writing Series 4* (Oshima & Hogue) & *How English Works* (Swan & Walter)

MODULE 1: ESSAY ARCHITECTURE, OUTLINING & THESIS STATEMENTS

Activity 1: Evaluating Thesis Statement Precision in Policy Briefs

CEFR: C1 | Advanced

Skill: Writing | **Subskill:** Thesis formulation & constraint framing | **Type:** Thesis Statement Writing

Objective: Formulate a precise, multi-pronged thesis statement containing a clear topic, controlling idea, and explicit subtopics.

Instructions: Draft a single-sentence thesis statement responding to the prompt regarding renewable energy adoption.

Task Prompt: Prompt: 'Should national governments mandate net-zero carbon building codes by 2030?'

Expected Output: Output: 'National governments must mandate net-zero carbon building codes by 2030 because such policies accelerate technological innovation, significantly decrease urban grid reliance, and mitigate long-term municipal climate vulnerabilities.'

Activity 2: Deconstructing Essay Outlines for Logical Alignment

CEFR: C1 | Advanced

Skill: Writing | **Subskill:** Structural hierarchy & topic sentence mapping | **Type:** Outline Construction

Objective: Align main topic sentences with sub-points in a formal 4-part essay outline.

Instructions: Map three supporting topic sentences to a provided thesis statement on remote work dynamics.

Task Prompt: Thesis: 'Hybrid workplace models enhance organizational productivity by improving employee retention, reducing real estate overhead, and broadening global talent acquisition.'

Expected Output: Output: '1. Topic Sentence 1: Flexible work schedules directly boost employee retention by reducing burnout. 2. Topic Sentence 2: Transitioning to hybrid frameworks minimizes corporate expenditures on commercial real estate. 3. Topic Sentence 3: Geographic independence allows organizations to recruit specialized talent from international pools.'

Activity 3: Converting Informal Prompts into Academic Essay Titles

CEFR: C2 | Title Formulation

Skill: Writing | **Subskill:** Academic register & essay scope definition | **Type:** Application

Objective: Transform casual essay questions into formal, academic titles with colon-separated subtitles.

Instructions: Rephrase: 'Why are social media apps making young people feel lonely?'

Task Prompt: Output: 'The Illusion of Connectivity: A Critical Analysis of Social Networking Platforms and Adolescent Isolation.'

Expected Output: Mastery

Activity 4: Identifying Thesis Statement Weaknesses & Scope Errors	CEFR: C1 Diagnostic Editing
Skill: Reading/Writing Subskill: Thesis evaluation & error diagnosis Type: Application	
Objective: Identify structural deficiencies in candidate thesis statements (too broad, too narrow, or pure fact) and revise them.	
Instructions: Critique and rewrite: 'Artificial intelligence is very popular and changing many industries today.'	
Task Prompt: Output: 'Deficiency: Too broad and purely descriptive. Revision: 'The integration of predictive artificial intelligence in healthcare diagnostics streamlines patient triage, yet it introduces significant ethical risks regarding algorithm bias and patient privacy.'	
Expected Output: <i>Advanced</i>	

Activity 5: Formulating Funnel Introductions for Academic Essays	CEFR: C1 Paragraph Writing
Skill: Writing Subskill: Introductory paragraph development Type: Application	
Objective: Construct a 4-sentence introductory paragraph following the funnel pattern: broad hook, narrowing context, specific thesis.	
Instructions: Write an introductory paragraph on urban congestion pricing.	
Task Prompt: Output: 'Metropolitan centers worldwide face unprecedented traffic gridlock, resulting in economic stagnation and elevated emissions. While traditional highway expansion projects yield diminishing returns, municipal authorities are increasingly considering economic interventions. Congestion pricing mechanisms offer a market-based solution by levying fees on vehicles entering commercial zones during peak hours. Ultimately, implementing urban congestion pricing reduces traffic volume, generates dedicated transit funding, and improves municipal air quality.'	
Expected Output: <i>Advanced</i>	

Activity 6: Designing Block vs. Point-by-Point Outlines	CEFR: C2 Comparative Planning
Skill: Writing Subskill: Comparative essay structure planning Type: Application	
Objective: Differentiate between block and point-by-point comparative essay outlines for complex macro-economic topics.	
Instructions: Create a point-by-point outline structure comparing central bank digital currencies (CBDCs) and traditional fiat currency across three criteria.	
Task Prompt: Output: 'Criteria 1: Transaction Speed (A. CBDC instant settlement vs. B. Fiat clearinghouse delays). Criteria 2: Monetary Policy Control (A. CBDC direct rate transmission vs. B. Fiat commercial bank intermediation). Criteria 3: Privacy (A. CBDC ledger visibility vs. B. Fiat cash anonymity).'	
Expected Output: <i>Mastery</i>	

Activity 7: Structuring Conclusion Paragraphs with Synthesis	CEFR: C1 Conclusion Drafting
Skill: Writing Subskill: Concluding rhetoric & broader implications Type: Application	
Objective: Draft a concluding paragraph that restates the thesis in novel language, summarizes key arguments, and offers a final forward-looking thought.	
Instructions: Write a conclusion for an essay arguing for mandatory digital literacy education.	
Task Prompt: Output: 'In summary, embedding comprehensive digital literacy into core secondary curricula is no longer optional. By equipping students with algorithmic awareness, source verification skills, and cybersecurity fundamentals, educational institutions safeguard democratic discourse. As information ecosystems grow increasingly complex, fostering critical media consumption remains the primary defense against digital manipulation.'	
Expected Output: <i>Advanced</i>	

Activity 8: Developing Hook Strategies for Academic Readers	CEFR: C2 Rhetorical Hooks
Skill: Writing Subskill: Rhetorical hooks & engagement Type: Application	
Objective: Draft three distinct opening hooks (statistic/fact, paradoxical statement, historical contrast) for an essay on automated supply chains.	
Instructions: Generate 3 hooks for an essay on supply chain automation.	
Task Prompt: Output: '1. Fact/Statistic: 'Over 70% of modern maritime freight moves through ports utilizing automated container handling.' 2. Paradox: 'The most human-centric global supply networks are now those entirely operated by autonomous algorithms.' 3. Historical Contrast: 'Where mid-century trade relied on manual dock labor, contemporary logistics hinges on automated predictive dispatch.'	
Expected Output: <i>Mastery</i>	

Activity 9: Auditing Essay Unity & Removing Off-Topic Sentences	CEFR: C1 Unity Audit
Skill: Reading/Writing Subskill: Paragraph unity & relevance evaluation Type: Application	
Objective: Analyze a body paragraph to identify and excise sentences that violate paragraph unity.	
Instructions: Identify the irrelevant sentence: '(1) Renewable energy microgrids enhance community resilience during extreme weather. (2) Local solar and wind storage units allow hospitals to maintain power independently. (3) Nuclear power plants require massive capital investment and decades to build. (4) Consequently, microgrids prevent catastrophic infrastructure failures.'	
Task Prompt: Output: 'Irrelevant sentence: (3). Reason: Sentence 3 introduces nuclear power construction costs, which diverges from the core topic of microgrid community resilience during severe weather.'	
Expected Output: <i>Advanced</i>	

Activity 10: Formulating Evaluative Thesis Statements for Literature Reviews	CEFR: C2 Evaluative Synthesis
Skill: Writing Subskill: Academic synthesis thesis formulation Type: Application	
Objective: Draft an evaluative thesis statement synthesizing conflicting academic literature on remote learning effectiveness.	
Instructions: Formulate a thesis evaluating conflicting studies on K-12 remote education outcomes.	
Task Prompt: Output: 'While early studies highlighted severe learning loss during forced remote instruction, subsequent empirical research demonstrates that synchronous, well-resourced digital learning environments yield academic outcomes comparable to traditional classrooms.'	
Expected Output: <i>Mastery</i>	

MODULE 2: PARAGRAPH COHERENCE, UNITY & LOGICAL FLOW

Activity 11: Mastering Transition Signal Precision in Argumentation	CEFR: C1 Advanced
Skill: Writing Subskill: Transitions & discourse coherence Type: Cohesion Upgrade	
Objective: Select and insert high-level transition signals (e.g., furthermore, conversely, hitherto, notwithstanding) to establish logical flow.	
Instructions: Insert appropriate transition signals into the paragraph on artificial intelligence ethics.	
Task Prompt: Task: 'Algorithm bias remains prevalent in credit scoring. [1], regulatory frameworks have failed to mandate transparency. [2], several fintech firms have voluntarily adopted open-source audit protocols.'	
Expected Output: <i>Output: '[1] Furthermore / Regrettably; [2] Notwithstanding this regulatory void / Conversely.'</i>	

Activity 12: Maintaining Pronoun Consistency Across Complex Sentences	CEFR: C1 Grammatical Consistency
Skill: Writing Subskill: Pronoun-antecedent agreement & reference Type: Application	
Objective: Correct shifting pronoun perspectives (e.g., switching from 'a researcher' to 'you' or 'they') to preserve academic objectivity.	
Instructions: Edit: 'When an analyst evaluates market volatility, you must consider interest rate hikes, because they cannot rely solely on historical trends.'	
Task Prompt: Output: 'When analysts evaluate market volatility, they must consider interest rate hikes, as they cannot rely solely on historical trends.'	
Expected Output: <i>Advanced</i>	

Activity 13: Establishing Logical Order: Chronological vs. Importance	CEFR: C1 Logical Ordering
Skill: Writing Subskill: Paragraph organization patterns Type: Application	
Objective: Reorder a scrambled set of sentences into a coherent logical sequence following order of importance.	
Instructions: Sequence these claims: '(A) Most critically, systemic bank failures destabilize public confidence. (B) Secondly, credit contractions restrict small business growth. (C) First, rising interest rates reduce consumer borrowing.'	
Task Prompt: Output: 'Order of Importance (Least to Most): C -> B -> A. (Or Most to Least: A -> B -> C, provided transitions match the ordering principle).'	
Expected Output: <i>Advanced</i>	

Activity 14: Using Key Noun Repetition & Synonyms for Cohesion	CEFR: C2 Cohesive Chaining
Skill: Writing Subskill: Lexical chains & cohesive devices Type: Application	
Objective: Build a cohesive lexical chain across four sentences using key noun repetition, elegant variation, and pronoun substitution.	
Instructions: Write a 4-sentence sequence about 'urban biodiversity' using lexical variation (e.g., city wildlife, urban ecosystems, biological diversity).	
Task Prompt: Output: 'Urban biodiversity plays a vital role in maintaining ecological equilibrium in metropolitan centers. These city ecosystems mitigate heat island effects and filter air pollutants. Furthermore, protecting biological diversity fosters community well-being. Preserving such green infrastructure remains essential for future urban planning.'	
Expected Output: <i>Mastery</i>	

Activity 15: Repairing Coherence Breaks in Technical Writing	CEFR: C1 Coherence Repair
Skill: Writing Subskill: Coherence diagnosis & structural repair Type: Application	
Objective: Identify and repair abrupt logical jumps in a technical description of cloud computing security.	
Instructions: Revise: 'Cloud storage offers high scalability. Encryption keys must be managed carefully. Data breaches cost millions annually.'	
Task Prompt: Output: 'Cloud storage offers high scalability for enterprise data management. However, to maintain this data securely, encryption keys must be managed carefully. Without robust key management, organizations risk severe data breaches that cost millions annually.'	
Expected Output: <i>Advanced</i>	

Activity 16: Deploying Such + Noun Phrases for Textual Binding	CEFR: C1 Textual Binding
Skill: Writing Subskill: Anaphoric determiners & text binding Type: Application	
Objective: Use 'such + noun' (e.g., such measures, such disparities, such innovation) to bind ideas across paragraph boundaries.	
Instructions: Combine two sentences using 'such + abstract noun': 'Central banks raised interest rates three times in six months. The aggressive monetary tightening slowed inflation but increased mortgage costs.'	
Task Prompt: Output: 'Central banks raised interest rates three times in six months; such aggressive monetary tightening effectively slowed inflation, though it escalated mortgage costs.'	
Expected Output: <i>Advanced</i>	

Activity 17: Eliminating Sentence Fragments & Run-ons in Drafts	CEFR: C1 Proofreading Mechanics
Skill: Writing Subskill: Sentence boundary mechanics Type: Application	
Objective: Diagnose and correct run-on sentences and comma splices in a student research essay draft.	
Instructions: Correct: 'The economic survey revealed consumer confidence is dropping, manufacturers are cutting output, businesses fear recession.'	
Task Prompt: Output: 'The economic survey revealed that consumer confidence is dropping and manufacturers are cutting output; consequently, businesses fear an impending recession.'	
Expected Output: <i>Advanced</i>	

Activity 18: Transitioning Between Paragraphs using Echo Words	CEFR: C2 Paragraph Linking
Skill: Writing Subskill: Inter-paragraph transitions Type: Application	
Objective: Construct a transition sentence linking two paragraphs using the 'echo word' technique (repeating a key concept from paragraph 1 in the topic sentence of paragraph 2).	
Instructions: Draft a topic sentence for Paragraph 2 (on solutions) that echoes Paragraph 1 (on ocean plastic pollution).	
Task Prompt: Output: 'While the environmental devastation of ocean plastic pollution is well-documented, mitigating this global ecological crisis requires scalable circular economy innovations.'	
Expected Output: <i>Mastery</i>	

Activity 19: Evaluating Consistent Tense Usage in Literature Summaries	CEFR: C1 Tense Alignment
Skill: Writing Subskill: Academic present tense consistency Type: Application	
Objective: Maintain consistent literary/academic present tense when summarizing published research findings.	
Instructions: Correct tense inconsistencies: 'In his landmark study, Smith argued that income inequality reduced growth, but Johnson shows that taxation balanced the effect.'	
Task Prompt: Output: 'In his landmark study, Smith argues that income inequality reduces growth; however, Johnson demonstrates that targeted taxation counterbalances this effect.'	
Expected Output: <i>Advanced</i>	

Activity 20: Designing Cohesive Parallel Structures in Series	CEFR: C2 Parallelism Refinement
Skill: Writing Subskill: Parallelism & stylistic elegance Type: Application	
Objective: Rewrite unbalanced sentences into elegant, grammatically parallel lists and series.	
Instructions: Rewrite: 'The consultant recommended restructuring the debt, that management should cut operational costs, and optimizing supply routes.'	
Task Prompt: Output: 'The consultant recommended restructuring corporate debt, cutting operational costs, and optimizing supply chain routes.'	
Expected Output: <i>Mastery</i>	

MODULE 3: CAUSE-AND-EFFECT RHETORICAL STRUCTURES

Activity 21: Distinguishing Direct Cause Verbs from Prepositional Links	CEFR: C1 Advanced
Skill: Writing Subskill: Causal structures & vocabulary Type: Causal Transformation	
Objective: Differentiate between causal verbs (precipitate, trigger, yield) and causal prepositional phrases (due to, stemming from, on account of).	
Instructions: Convert a causal sentence using 'because' into one using 'precipitate' and another using 'stemming from'.	
Task Prompt: Prompt: 'Interest rates surged because foreign capital unexpectedly fled the market.'	
Expected Output: <i>Output: '1. Verb: The unexpected flight of foreign capital precipitated a surge in interest rates. 2. Prepositional: The surge in interest rates was primarily due to capital flight stemming from market uncertainty.'</i>	

Activity 22: Mapping Causal Chains in Environmental Science Writing	CEFR: C2 Causal Chaining
Skill: Writing Subskill: Multi-stage cause-effect chaining Type: Application	
Objective: Draft a 4-stage causal chain paragraph using varied transition devices (consequently, as a direct result, thereby causing, ultimately leading to).	
Instructions: Write a causal chain explaining how deforestation leads to desertification.	
Task Prompt: Output: 'Uncontrolled deforestation removes deep canopy root systems. As a direct result, topsoil loses structural cohesion and becomes highly vulnerable to wind erosion. Consequently, nutrient-rich earth washes away during heavy rains, thereby causing severe soil degradation that ultimately leads to desertification.'	
Expected Output: <i>Mastery</i>	

Activity 23: Expressing Causal Nuance: Softening Definite Cause Claims	CEFR: C1 Causal Hedging
Skill: Writing Subskill: Hedging & causal qualification Type: Application	
Objective: Modify overly assertive causal claims using hedging adverbs and verbs (tend to contribute to, may be attributed partly to, appears to foster).	
Instructions: Soften: 'Social media usage causes adolescent depression.'	
Task Prompt: Output: 'Excessive social media consumption appears to contribute significantly to adolescent psychological distress, potentially exacerbating pre-existing isolation.'	
Expected Output: <i>Advanced</i>	

Activity 24: Reversing Cause and Effect Focus in Academic Syntax	CEFR: C1 Focus Reversal
Skill: Writing Subskill: Syntactic focus & passive causatives Type: Application	
Objective: Transform an effect-focused sentence into a cause-focused sentence while maintaining academic register.	
Instructions: Transform (Effect-focused): 'Severe crop failures were caused by the prolonged drought in the central plains.' -> (Cause-focused)	
Task Prompt: Output: 'The prolonged drought in the central plains induced severe crop failures across agricultural sectors.'	
Expected Output: <i>Advanced</i>	

Activity 25: Drafting Cause-and-Effect Essays: Block vs. Chain Pattern	CEFR: C2 Causal Essay Design
Skill: Writing Subskill: Essay structure & causal organization Type: Application	
Objective: Compare the structural efficiency of Block vs. Chain cause-and-effect essay organization for global inflation analysis.	
Instructions: Construct two short outlines (Block vs. Chain) analyzing the global inflation crisis.	
Task Prompt: Output: 'Block Pattern: Section 1: All Causes (supply bottlenecks, energy costs, stimulus spending) -> Section 2: All Effects (reduced purchasing power, wage pressure, central bank rate hikes). Chain Pattern: Link 1: Supply bottlenecks cause energy cost spikes -> Link 2: Energy cost spikes drive up production overhead -> Link 3: Overhead increases prompt retail price inflation.'	
Expected Output: <i>Mastery</i>	

Activity 26: Using Participle Clauses for Concise Result Expressions	CEFR: C1 Clausal Compression
Skill: Writing Subskill: Participle clauses & result clause reduction Type: Application	
Objective: Combine two sentences using a present participle clause of result (, thereby -ing / , resulting in).	
Instructions: Combine: 'The corporation automated its fulfillment centers. This move reduced operational overhead by 25%.'	
Task Prompt: Output: 'The corporation automated its fulfillment centers, thereby reducing operational overhead by 25%.'	
Expected Output: <i>Advanced</i>	

Activity 27: Analyzing False Cause Fallacies (Post Hoc Ergo Propter Hoc)	CEFR: C2 Fallacy Analysis
Skill: Critical Thinking/Writing Subskill: Logical fallacies & rigorous reasoning Type: Application	
Objective: Identify and critique a false cause fallacy in a business analysis excerpt.	
Instructions: Critique: 'Our company launched a new logo in Q2, and sales rose by 15% in Q3. Therefore, the new logo caused our sales growth.'	
Task Prompt: Output: 'Fallacy: Post hoc ergo propter hoc. Critique: The argument incorrectly assumes temporal succession proves causation, ignoring confounding variables such as Q3 marketing expenditure, seasonal demand spikes, or macroeconomic recovery.'	
Expected Output: <i>Mastery</i>	

Activity 28: Deploying Cause-and-Effect Nouns (Factor, Implication, Catalyst)	CEFR: C1 Abstract Lexicon
Skill: Writing Subskill: Abstract causal nouns Type: Application	
Objective: Incorporate sophisticated abstract causal nouns (catalyst, byproduct, contributor, root cause, repercussion) into a policy evaluation.	
Instructions: Draft 3 sentences analyzing urban decay using 'catalyst', 'root cause', and 'repercussion'.	
Task Prompt: Output: 'Deindustrialization served as the primary catalyst for rapid population decline. However, the root cause of municipal decay lay in prolonged infrastructure underinvestment. A major repercussion of this neglect was the erosion of the local commercial tax base.'	
Expected Output: <i>Advanced</i>	

Activity 29: Writing Cause-and-Effect Paragraphs with Conditionals	CEFR: C2 Hypothetical Reasoning
Skill: Writing Subskill: Hypothetical causation & conditionals Type: Application	
Objective: Construct a hypothetical cause-and-effect argument using past unfulfilled conditionals (Third Conditional / Mixed Conditional).	
Instructions: Draft a sentence analyzing past financial policy failures.	
Task Prompt: Output: 'Had regulatory agencies enforced stringent capital reserve ratios prior to the market shock, commercial banks would not currently require emergency state bailouts.'	
Expected Output: <i>Mastery</i>	

Activity 30: Editing Causal Overstatement in Scientific Abstracts	CEFR: C1 Scientific Editing
Skill: Writing Subskill: Precision & scientific hedging Type: Application	
Objective: Identify and correct absolute causal assertions in a medical research abstract.	
Instructions: Edit: 'This drug completely cures autoimmune inflammation by destroying bad antibodies.'	
Task Prompt: Output: 'Clinical trials indicate that this therapeutic agent significantly attenuates autoimmune inflammation by selectively targeting pathogenic antibodies.'	
Expected Output: <i>Advanced</i>	

MODULE 4: COMPARISON-AND-CONTRAST ESSAY MECHANICS

Activity 31: Comparative Transition Structures: Whereas vs. In Contrast	CEFR: C1 Contrast Mechanics
Skill: Writing Subskill: Contrast transitions & subordination Type: Application	
Objective: Contrast two business models using subordinators (whereas, while) vs. adverbial contrasts (in contrast, on the other hand, conversely).	
Instructions: Draft two sentences contrasting startup agility with corporate stability.	
Task Prompt: Output: '1. Subordinator: While early-stage startups pivot rapidly in response to market shifts, mature corporations rely on established operational structures. 2. Adverbial: Early-stage startups pivot rapidly in response to market shifts; in contrast, mature corporations prioritize operational stability and governance.'	
Expected Output: <i>Advanced</i>	

Activity 32: Using Comparative Adjectives & Double Comparatives	CEFR: C1 Comparative Precision
Skill: Writing Subskill: Advanced comparison structures Type: Application	
Objective: Construct double comparative structures (the more... the more...) to describe proportional economic trends.	
Instructions: Draft a double comparative sentence relating education spending and civic engagement.	
Task Prompt: Output: 'The more comprehensively a municipality invests in public educational infrastructure, the more resilient its local democratic institutions become.'	
Expected Output: <i>Advanced</i>	
Activity 33: Designing Point-by-Point Comparison Matrices	CEFR: C2 Comparative Analysis
Skill: Writing Subskill: Analytical comparison planning Type: Application	
Objective: Develop an analytical comparison matrix evaluating renewable energy sources (Solar vs. Wind) across capacity, cost, and reliability.	
Instructions: Construct a 3-row matrix comparing Solar and Wind energy.	
Task Prompt: Output: '1. Capital Expenditure: Solar requires low modular initial setup vs. Wind involves high offshore infrastructure investment. 2. Grid Reliability: Solar is limited by diurnal cycles vs. Wind experiences seasonal velocity variance. 3. Environmental Impact: Solar faces panel recycling challenges vs. Wind impacts avian fauna.'	
Expected Output: <i>Mastery</i>	
Activity 34: Qualifying Nuanced Similarities (Just as, Likewise, Similar to)	CEFR: C1 Analogy Writing
Skill: Writing Subskill: Comparison markers & qualification Type: Application	
Objective: Express subtle structural similarities between two distinct historical events using comparison markers (likewise, similarly, just as... so too).	
Instructions: Compare the 1929 stock crash with the 2008 financial crisis using 'just as... so too'.	
Task Prompt: Output: 'Just as unregulated margin buying fueled speculative asset bubbles in 1929, so too did opaque subprime securitization destabilize global financial markets in 2008.'	
Expected Output: <i>Advanced</i>	
Activity 35: Avoiding Unbalanced Comparison Errors in Essays	CEFR: C1 Faulty Comparison Repair
Skill: Writing Subskill: Comparative balance & parallelism Type: Application	
Objective: Identify and fix illogically unbalanced comparison structures (faulty comparisons).	
Instructions: Correct: 'The salary of a software engineer in Silicon Valley is higher than London.'	
Task Prompt: Output: 'The salary of a software engineer in Silicon Valley is significantly higher than that of a counterpart in London.'	
Expected Output: <i>Advanced</i>	

Activity 36: Deploying Comparative Nouns (Distinction, Parallel, Divergence)	CEFR: C2 Comparative Lexicon
Skill: Writing Subskill: Comparative abstract vocabulary Type: Application	
Objective: Incorporate high-level comparative nouns (divergence, discrepancy, striking parallel, fundamental distinction) into a political analysis.	
Instructions: Draft two sentences analyzing two electoral systems using 'divergence' and 'fundamental distinction'.	
Task Prompt: Output: 'A fundamental distinction between parliamentary and presidential systems lies in the separation of executive and legislative powers. This structural divergence produces markedly different legislative coalition dynamics.'	
Expected Output: <i>Mastery</i>	

Activity 37: Synthesizing Similarities and Differences in One Paragraph	CEFR: C1 Paragraph Synthesis
Skill: Writing Subskill: Balanced comparison synthesis Type: Application	
Objective: Write a cohesive 5-sentence paragraph synthesizing both similarities and differences between public and private healthcare systems.	
Instructions: Draft a balanced comparison paragraph on healthcare models.	
Task Prompt: Output: 'Public and private healthcare systems share the overarching objective of delivering comprehensive medical care to populations. Both frameworks rely on highly trained clinical personnel and standardized medical protocols. However, a profound divergence exists regarding funding mechanisms and resource allocation. While public systems prioritize equitable access through taxation, private networks operate on fee-for-service models that optimize technological innovation but may exacerbate care disparities.'	
Expected Output: <i>Advanced</i>	

Activity 38: Using Cautious Language in Comparative Evaluations	CEFR: C1 Comparative Qualification
Skill: Writing Subskill: Comparative hedging & objectivity Type: Application	
Objective: Apply hedging qualifiers (marginally superior, conditionally effective, somewhat less pronounced) to avoid dogmatic comparisons.	
Instructions: Soften: 'Electric vehicles are far better in every way than internal combustion cars.'	
Task Prompt: Output: 'Electric vehicles offer substantially lower tailpipe emissions and reduced operating costs; however, their overall environmental advantage remains conditionally dependent on regional power grid decarbonization.'	
Expected Output: <i>Advanced</i>	

Activity 39: Structuring Block Comparisons for Complex Case Studies	CEFR: C2 Case Study Architecture
Skill: Writing Subskill: Block comparative essay architecture Type: Application	
Objective: Draft a block comparative introduction outlining two national economic models (Nordic Model vs. Anglo-Saxon Model).	
Instructions: Write a thesis statement and block outline for comparing the Nordic and Anglo-Saxon economic models.	
Task Prompt: Output: 'Thesis: While both the Nordic and Anglo-Saxon models foster prosperous market economies, they diverge fundamentally in state welfare intervention and labor market regulation. Block 1: Nordic Model (high taxation, universal social safety net, centralized wage bargaining). Block 2: Anglo-Saxon Model (deregulated labor, targeted welfare, shareholder-driven corporate governance).'	
Expected Output: <i>Mastery</i>	

Activity 40: Editing Comparative Redundancies in Academic Drafts	CEFR: C1 Redundancy Editing
Skill: Writing Subskill: Conciseness & comparative mechanics Type: Application	
Objective: Identify and remove redundant comparative phrasing (e.g., more preferable, equally as good as, mutually same).	
Instructions: Edit: 'Option A is much more preferable than Option B because both are equally as effective as each other.'	
Task Prompt: Output: 'Option A is preferable to Option B, as both options demonstrate equal efficacy.'	
Expected Output: <i>Advanced</i>	

MODULE 5: ARGUMENTATIVE ESSAY & COUNTER-ARGUMENT STRATEGIES

Activity 41: Formulating Rebuttal Structures: Concession + Refutation	CEFR: C1 Counter-Argument Refutation
Skill: Writing Subskill: Counter-argumentation & concession Type: Application	
Objective: Construct a classical counter-argument paragraph incorporating a concession marker (Admittedly, Granted) followed by a strong refutation (However, Nevertheless).	
Instructions: Draft a concession-refutation sequence regarding universal basic income (UBI).	
Task Prompt: Output: 'Admittedly, opponents argue that implementing universal basic income imposes an unsustainable fiscal burden on sovereign treasuries. Granted, funding universal disbursements requires substantial tax restructuring. Nevertheless, empirical pilot programs demonstrate that UBI drastically reduces administrative welfare overhead while stimulating local consumer spending, ultimately offsetting initial capital outlays.'	
Expected Output: <i>Advanced</i>	

Activity 42: Calibrating Persuasive Stance: Modal Certainty vs. Caution	CEFR: C2 Stance Calibration
Skill: Writing Subskill: Persuasive stance & modal control Type: Application	
Objective: Calibrate argument force by replacing aggressive assertions with calibrated modal expressions (compellingly suggests, strongly indicates, warrants immediate consideration).	
Instructions: Upgrade an overly aggressive argument: 'The government must immediately ban plastic packaging because it ruins the entire planet.'	
Task Prompt: Output: 'Given the accelerating ecological degradation of marine ecosystems, municipal authorities should implement phased restrictions on single-use plastic packaging to incentivize sustainable material innovation.'	
Expected Output: <i>Mastery</i>	

Activity 43: Identifying Argumentative Fallacies: Ad Hominem & Straw Man	CEFR: C1 Fallacy Correction
Skill: Critical Thinking/Writing Subskill: Fallacy identification & logical rigor Type: Application	
Objective: Analyze an op-ed excerpt to identify and correct straw man fallacies.	
Instructions: Identify and correct the straw man: 'Critics of public transit expansion simply want to take away private cars and force everyone to ride crowded buses.'	
Task Prompt: Output: 'Fallacy: Straw Man. Revision: Critics of public transit expansion legitimately question whether high capital expenditure on light rail yields sufficient ridership compared to investing in road maintenance or autonomous traffic management.'	
Expected Output: <i>Advanced</i>	

Activity 44: Deploying Argumentative Signposts (Proponents contend, Critics counter)	CEFR: C1 Debate Framing
Skill: Writing Subskill: Attribution & argumentative framing Type: Application	
Objective: Use formal attribution verbs and signposts to present competing perspectives neutrally before taking a stance.	
Instructions: Draft 2 sentences framing a debate on corporate tax rates using 'Proponents contend' and 'Conversely, detractors argue'.	
Task Prompt: Output: 'Proponents contend that lowering corporate tax rates stimulates foreign direct investment and fosters domestic capital formation. Conversely, detractors argue that such reductions exacerbate income inequality while eroding public revenue needed for essential infrastructure.'	
Expected Output: <i>Advanced</i>	

Activity 45: Structuring Toulmin Model Arguments (Claim, Data, Warrant)	CEFR: C2 Toulmin Argumentation
Skill: Writing Subskill: Argument structure & Toulmin model Type: Application	
Objective: Construct a 3-sentence argument structured explicitly around the Toulmin model: Claim, Data, and Underlying Warrant.	
Instructions: Write a Toulmin argument advocating for mandatory cybersecurity audits for commercial banks.	
Task Prompt: Output: 'Claim: Commercial banks must be subjected to mandatory annual cybersecurity audits. Data: Financial institutions experienced a 40% surge in ransomware intrusions over the past fiscal year. Warrant: Because systemic financial stability depends entirely on digital asset integrity, unmitigated banking vulnerabilities threaten broader national security.'	
Expected Output: <i>Mastery</i>	

Activity 46: Refining Counter-Argument Paragraph Placement in Essays	CEFR: C1 Strategic Organization
Skill: Writing Subskill: Essay organization & strategic flow Type: Application	
Objective: Determine the optimal placement for counter-argument paragraphs (Early Concession vs. Pre-Conclusion Rebuttal) based on essay strategy.	
Instructions: Explain when to place counter-arguments before body paragraphs vs. after main body paragraphs.	
Task Prompt: Output: 'Placement Strategy: Place counter-arguments early when addressing deeply entrenched audience preconceptions to clear objections before presenting novel arguments. Place counter-arguments near the conclusion when building cumulative evidence first, using the rebuttal as a final decisive proof.'	
Expected Output: <i>Advanced</i>	

Activity 47: Writing Persuasive Rhetorical Questions Without Informal Tone	CEFR: C2 Formal Rhetoric
Skill: Writing Subskill: Rhetorical devices in formal writing Type: Application	
Objective: Transform informal rhetorical questions into formal academic focus statements or indirect questions.	
Instructions: Rephrase: 'Why should taxpayers fund space exploration when people are starving?'	
Task Prompt: Output: 'This policy debate raises a fundamental ethical question: whether public expenditure on deep-space exploration can be justified alongside pressing domestic socioeconomic challenges.'	
Expected Output: <i>Mastery</i>	

Activity 48: Evaluating Argument Strength: Fact vs. Expert Opinion vs. Anecdote	CEFR: C1 Evidence Hierarchy
Skill: Writing Subskill: Evidence evaluation & credibility Type: Application	
Objective: Rank three supporting evidence statements from weakest to strongest for an essay on remote work productivity.	
Instructions: Rank and justify: (A) 'My cousin works from home and says he gets more done.' (B) 'A Stanford study of 16,000 workers revealed a 13% performance increase in remote staff.' (C) 'Remote work is popular among many tech professionals.'	
Task Prompt: Output: 'Ranking (Weakest to Strongest): A (Anecdotal) -> C (Vague generalization) -> B (Empirical peer-reviewed research). Justification: Academic argumentation prioritizes empirical, methodology-backed data over personal anecdotes or unverified general consensus.'	
Expected Output: <i>Advanced</i>	

Activity 49: Drafting Cautious Recommendations in Policy Essays	CEFR: C1 Policy Drafting
Skill: Writing Subskill: Policy proposals & normative rhetoric Type: Application	
Objective: Draft a policy recommendation section utilizing normative conditionals (should, ought to, must be accompanied by) and risk hedges.	
Instructions: Draft a recommendation paragraph on regulating algorithmic social media feeds.	
Task Prompt: Output: 'Policy makers should enact legislation requiring social media platforms to offer chronologically sorted feeds. To minimize regulatory overreach, such mandates ought to be accompanied by independent auditing bodies that evaluate algorithmic transparency without compromising commercial trade secrets.'	
Expected Output: <i>Advanced</i>	

Activity 50: Editing Dogmatic & Subjective Tone in Debating Essays	CEFR: C2 Academic Objectivity
Skill: Writing Subskill: Objectivity & register refinement Type: Application	
Objective: Edit an overly emotional debate draft to restore academic distance and objective force.	
Instructions: Edit: 'It is completely ridiculous and evil that government officials refuse to pass strict gun control laws immediately.'	
Task Prompt: Output: 'The persistent legislative deadlock regarding comprehensive firearm regulation highlights deep ideological divides, drawing severe criticism from public health advocates who emphasize the preventable loss of life.'	
Expected Output: <i>Mastery</i>	

MODULE 6: COMPLEX SENTENCE PATTERNS & SUBORDINATING CLAUSES

Activity 51: Subordinate Clause Inversion & Emphasis (Although, Even though)	CEFR: C1 Clause Fronting
Skill: Grammar/Writing Subskill: Adverbial clauses & syntactic fronting Type: Application	
Objective: Invert subordinate concession clauses to the front of sentences to establish thematic contrast.	
Instructions: Front the subordinate clause: 'Central banks raised interest rates rapidly, although inflation showed signs of cooling.'	
Task Prompt: Output: 'Although inflation showed initial signs of cooling, central banks raised interest rates rapidly to anchor long-term price expectations.'	
Expected Output: <i>Advanced</i>	

Activity 52: Building Complex-Compound Sentences for Dense Ideas		CEFR: C2 Sentence Synthesis
Skill: Grammar/Writing Subskill: Compound-complex sentence synthesis Type: Application		
Objective: Synthesize three simple ideas into a single compound-complex sentence containing two independent clauses and at least one subordinate clause.		
Instructions: Combine: 'The startup secured Series A funding. The market shifted unexpectedly. The company adapted its product line.'		
Task Prompt: Output: 'Although the market shifted unexpectedly shortly after the startup secured Series A funding, the leadership team adapted its core product line, and revenues stabilized within two quarters.'		
Expected Output: <i>Mastery</i>		

Activity 53: Punctuation Precision with Relative Clauses: Restrictive vs. Non-Restrictive		CEFR: C1 Semantic Punctuation
Skill: Grammar/Writing Subskill: Relative clauses & comma mechanics Type: Application		
Objective: Differentiate restrictive (no commas) and non-restrictive (commas) relative clauses to prevent semantic ambiguity.		
Instructions: Punctuate and explain the meaning shift: 'The legal team members who reviewed the contract approved the merger.' vs. 'The legal team members, who reviewed the contract, approved the merger.'		
Task Prompt: Output: '1. Restrictive (no commas): Only those specific legal team members who reviewed the contract approved the merger (others may not have). 2. Non-restrictive (commas): All members of the legal team reviewed the contract, and all of them approved the merger.'		
Expected Output: <i>Advanced</i>		

Activity 54: Using Reducing Adverb Clauses to Participle Phrases		CEFR: C1 Participle Reduction
Skill: Grammar/Writing Subskill: Clause reduction & stylistic economy Type: Application		
Objective: Reduce adverb clauses of time and concession to present or past participle phrases.		
Instructions: Reduce: 'While the committee evaluated the budget proposal, they discovered severe financial discrepancies.'		
Task Prompt: Output: 'While evaluating the budget proposal, the committee discovered severe financial discrepancies.'		
Expected Output: <i>Advanced</i>		

Activity 55: Avoiding Dangling & Misplaced Participles in Complex Sentences		CEFR: C1 Modifier Repair
Skill: Grammar/Writing Subskill: Syntactic alignment & error correction Type: Application		
Objective: Diagnose and correct dangling modifiers where the logical subject of the participle is missing.		
Instructions: Correct: 'Having analyzed the survey results, the conclusion was drawn by the research team.'		
Task Prompt: Output: 'Having analyzed the survey results, the research team drew their final conclusion.'		
Expected Output: <i>Advanced</i>		

Activity 56: Mastering Conditional Inversion Without 'If' (Had I known, Were they to)		CEFR: C2 Conditional Inversion
Skill: Grammar/Writing Subskill: Formal inverted conditionals Type: Application		
Objective: Transform standard conditional sentences into formal inverted structures without 'if' (Had, Were, Should).		
Instructions: Invert: 'If the board had known about the liability, they would have halted the acquisition.'		
Task Prompt: Output: 'Had the board known about the undisclosed liability, they would have halted the acquisition immediately.'		
Expected Output: <i>Mastery</i>		
Activity 57: Deploying Subordinators of Purpose: In order that / So that		CEFR: C1 Purpose Subordination
Skill: Grammar/Writing Subskill: Purpose clauses & formal register Type: Application		
Objective: Construct purpose clauses using formal subordinators (in order that, so that + modal) in administrative policy drafts.		
Instructions: Combine: 'The university updated its server infrastructure. Students can access course materials during peak hours without latency.'		
Task Prompt: Output: 'The university updated its server infrastructure so that students might access course materials during peak demand hours without system latency.'		
Expected Output: <i>Advanced</i>		
Activity 58: Syntactic Variety: Alternating Sentence Starts in Drafts		CEFR: C2 Syntactic Variety
Skill: Writing Subskill: Sentence pattern variation Type: Application		
Objective: Rewrite a monotonous text paragraph (where every sentence begins Subject-Verb) by varying sentence openings (prepositional phrase, participle clause, adverbial fronting).		
Instructions: Vary sentence openings: 'The CEO delivered the keynote address. He outlined the merger strategy. He urged shareholders to approve the deal.'		
Task Prompt: Output: 'Delivering the keynote address to a full auditorium, the CEO outlined the strategic vision for the upcoming merger. Unveiling the financial projections, he urgently encouraged shareholders to ratify the agreement.'		
Expected Output: <i>Mastery</i>		
Activity 59: Expressing Proportional Change with 'As' Clauses		CEFR: C1 Proportional Syntax
Skill: Grammar/Writing Subskill: Proportional adverbial clauses Type: Application		
Objective: Use proportional 'as' clauses to express simultaneous dynamic changes in scientific and economic contexts.		
Instructions: Draft a sentence correlating market interest rates and bond prices using 'as'.		
Task Prompt: Output: 'As central banks steadily elevate benchmark interest rates, yields on existing fixed-rate bonds fall proportionally in secondary trading markets.'		
Expected Output: <i>Advanced</i>		

Activity 60: Proofreading Complex Sentence Structures for Run-ons	CEFR: C1 Boundary Auditing
Skill: Grammar/Writing Subskill: Clausal boundary auditing Type: Application	
Objective: Audit and fix fused complex sentences lacking proper subordinating or coordinating conjunctions.	
Instructions: Correct: 'Although the trial generated promising initial clinical data further longitudinal research is necessary before market launch can occur.'	
Task Prompt: Output: 'Although the trial generated promising initial clinical data, further longitudinal research is necessary before market launch can occur.'	
Expected Output: <i>Advanced</i>	

MODULE 7: ADVANCED NOUN CLAUSES, RELATIVE CLAUSES & NOMINALIZATION

Activity 61: Transforming Direct Questions into Formal Embedded Noun Clauses	CEFR: C1 Noun Clause Subject
Skill: Grammar/Writing Subskill: Noun clause transformation & directness Type: Application	
Objective: Transform direct questions into formal embedded noun clauses acting as subjects or direct objects.	
Instructions: Transform: 'How did the financial deficit accumulate so rapidly?' into a subject noun clause.	
Task Prompt: Output: 'How the financial deficit accumulated so rapidly remains a central question for legislative investigators.'	
Expected Output: <i>Advanced</i>	

Activity 62: Nominalization for Formal Academic Objectivity	CEFR: C2 Nominalization Style
Skill: Writing Subskill: Nominalization & academic style Type: Application	
Objective: Convert verb-heavy active clauses into dense abstract noun phrases to increase academic formality.	
Instructions: Nominalize: 'Because the government failed to regulate banks effectively, the economy collapsed rapidly.'	
Task Prompt: Output: 'The ineffective governmental regulation of commercial financial institutions precipitated a rapid economic collapse.'	
Expected Output: <i>Mastery</i>	

Activity 63: Relative Pronouns with Prepositions (To whom, In which, Whereby)	CEFR: C1 Prepositional Relatives
Skill: Grammar/Writing Subskill: Prepositional relative clauses Type: Application	
Objective: Construct formal relative clauses incorporating prepositions before relative pronouns (in which, to whom, whereby, upon which).	
Instructions: Combine: 'The legal framework established new compliance standards. Companies must operate under these standards.'	
Task Prompt: Output: 'The legal framework established new compliance standards under which all commercial enterprises must operate.'	
Expected Output: <i>Advanced</i>	

Activity 64: Using 'Wh-ever' Generalized Noun Clauses	CEFR: C1 Generalized Clauses
Skill: Grammar/Writing Subskill: Indefinite relative noun clauses Type: Application	
Objective: Deploy generalized noun clauses (whatever, whoever, whichever, wherever) in policy and legal contexts.	
Instructions: Draft a sentence defining corporate compliance policy using 'whichever'.	
Task Prompt: Output: 'Subcontractors must adhere to state environmental guidelines or municipal building codes, whichever imposes the stricter threshold.'	
Expected Output: <i>Advanced</i>	

Activity 65: Reducing Relative Clauses to Post-Modifying Adjective Phrases	CEFR: C1 Relative Reduction
Skill: Grammar/Writing Subskill: Relative clause reduction Type: Application	
Objective: Reduce restrictive relative clauses containing passive verbs or adjectives to concise post-modifying phrases.	
Instructions: Reduce: 'The reports that were submitted by the external audit firm revealed minor bookkeeping errors.'	
Task Prompt: Output: 'The reports submitted by the external audit firm revealed minor bookkeeping errors.'	
Expected Output: <i>Advanced</i>	

Activity 66: Appositive Noun Phrases for Concise Attribution	CEFR: C2 Appositive Synthesis
Skill: Writing Subskill: Appositives & informational density Type: Application	
Objective: Incorporate appositive noun phrases to combine background information and attribution smoothly without adding extra clauses.	
Instructions: Combine: 'Dr. Aris Thorne is a leading expert on quantum computing. He addressed the congressional panel yesterday.'	
Task Prompt: Output: 'Dr. Aris Thorne, a leading expert on quantum computing, addressed the congressional panel yesterday.'	
Expected Output: <i>Mastery</i>	

Activity 67: Mastering Mandative Subjunctive in 'That' Noun Clauses	CEFR: C2 Mandative Subjunctive
Skill: Grammar/Writing Subskill: Subjunctive mood in noun clauses Type: Application	
Objective: Use the mandative subjunctive (bare infinitive) in 'that' clauses following verbs/adjectives of demand, requirement, or recommendation.	
Instructions: Draft a sentence following: 'The regulatory agency demanded that the corporation [to unveil / unveil / unveils] its security protocols.'	
Task Prompt: Output: 'The regulatory agency demanded that the corporation unveil its proprietary security protocols immediately.'	
Expected Output: <i>Mastery</i>	

Activity 68: Diagnosing Resumptive Pronoun Errors in Relative Clauses	CEFR: C1 Resumptive Repair
Skill: Grammar/Writing Subskill: Syntactic error diagnosis Type: Application	
Objective: Identify and excise redundant resumptive pronouns in complex relative clauses.	
Instructions: Correct: 'This is the comprehensive policy document that the committee discussed it during yesterday's session.'	
Task Prompt: Output: 'This is the comprehensive policy document that the committee discussed during yesterday's session.'	
Expected Output: <i>Advanced</i>	

Activity 69: Fact-That Noun Clauses for Evidence Presentation	CEFR: C1 Fact-That Framing
Skill: Writing Subskill: Fact-that structures & objective stance Type: Application	
Objective: Incorporate 'The fact that + clause' as subject or object to present empirical observations objectively.	
Instructions: Draft a sentence opening with 'The fact that...'	
Task Prompt: Output: 'The fact that oceanic temperatures reached record highs in 2023 underscores the accelerating pace of global thermal expansion.'	
Expected Output: <i>Advanced</i>	

Activity 70: Evaluating Nominalization Overuse ('Zombie Nouns')	CEFR: C2 Clarity Editing
Skill: Writing Subskill: Clarity & active prose balance Type: Application	
Objective: De-nominalize an excessively dense, unreadable sentence to restore clarity and active verb momentum.	
Instructions: De-nominalize: 'The implementation of the utilization of automated tracking led to the achievement of cost reductions.'	
Task Prompt: Output: 'Utilizing automated tracking allowed the logistics team to reduce operational costs substantially.'	
Expected Output: <i>Mastery</i>	

MODULE 8: PASSIVE VOICE, IMPERSONAL REPORTING & MODAL NUANCE

Activity 71: Impersonal Passive Reporting (It is thought that / X is said to be)	CEFR: C1 Impersonal Passives
Skill: Grammar/Writing Subskill: Impersonal passive structures Type: Application	
Objective: Convert active reporting statements into two impersonal passive reporting structures (It + passive + that / Subject + passive + to-infinitive).	
Instructions: Convert: 'Analysts believe that the market will recover by Q4.'	
Task Prompt: Output: '1. It is believed that the market will recover by Q4. 2. The market is believed to recover by Q4.'	
Expected Output: <i>Advanced</i>	

Activity 72: Strategic Agent Suppression in Technical & Lab Reports	CEFR: C1 Agent Suppression
Skill: Writing Subskill: Passive voice & scientific objectivity Type: Application	
Objective: Transform an active personal lab narrative into an objective passive report where agent suppression is stylistically required.	
Instructions: Rewrite: 'We mixed 50ml of saline solution into the beaker and then we measured the temperature rise.'	
Task Prompt: Output: 'Fifty milliliters of saline solution were added to the beaker, after which the temperature elevation was recorded.'	
Expected Output: <i>Advanced</i>	

Activity 73: Modal Passives for Policy & Statutory Guidelines	CEFR: C1 Regulatory Passives
Skill: Grammar/Writing Subskill: Modal passives & legal requirements Type: Application	
Objective: Construct modal passive sentences (must be submitted, should be evaluated, may be requested) for formal policy guidelines.	
Instructions: Draft 3 regulatory guidelines for data protection using modal passives.	
Task Prompt: Output: '1. User access logs must be retained for a minimum of 24 months. 2. System vulnerability assessments should be conducted bi-annually. 3. Personal identification data may be disclosed only upon receipt of a valid judicial warrant.'	
Expected Output: <i>Advanced</i>	

Activity 74: Continuous & Perfect Passive Infinitives	CEFR: C2 Perfect Passive Infinitive
Skill: Grammar/Writing Subskill: Complex infinitive structures Type: Application	
Objective: Deploy continuous and perfect passive infinitives (to be being evaluated, to have been conducted) in historical reviews.	
Instructions: Draft a sentence using 'is reported to have been audited'.	
Task Prompt: Output: 'The commercial bank is reported to have been audited by regulatory officials prior to the sudden liquidity freeze.'	
Expected Output: <i>Mastery</i>	

Activity 75: Avoiding Unnecessary Passive Voice in Narrative Prose	CEFR: C1 Voice Calibration
Skill: Writing Subskill: Voice selection & active vigor Type: Application	
Objective: Identify and convert clumsy or unnecessary passives into concise active voice sentences.	
Instructions: Convert: 'The decision to launch the product was made by the executive board after the market research was completed by the team.'	
Task Prompt: Output: 'The executive board decided to launch the product after the marketing team completed their research.'	
Expected Output: <i>Advanced</i>	

Activity 76: Epistemic Modal Nuance: Must have vs. Could have vs. Might have	CEFR: C2 Past Epistemic Modals
Skill: Grammar/Writing Subskill: Modal deductions about the past Type: Application	
Objective: Differentiate levels of past deduction using epistemic past modals (must have, could have, might have, cannot have) in investigative reports.	
Instructions: Analyze a historic system failure using three distinct past modal certainty levels.	
Task Prompt: Output: '1. High Certainty: The server failure must have occurred due to power loss. 2. Moderate Possibility: The malware might have breached the system through an unpatched firmware port. 3. Negative Certainty: The intruder cannot have bypassed multi-factor authentication without insider credentials.'	
Expected Output: <i>Mastery</i>	

Activity 77: Causative Passives (Have/Get something done)	CEFR: C1 Causative Passive
Skill: Grammar/Writing Subskill: Causative structures in formal context Type: Application	
Objective: Use formal causative passive structures (have + object + past participle) in enterprise infrastructure planning.	
Instructions: Draft a sentence describing corporate security upgrades using 'have + object + past participle'.	
Task Prompt: Output: 'The enterprise intends to have its mainframe architecture audited by an independent cybersecurity firm before Q3.'	
Expected Output: <i>Advanced</i>	

Activity 78: Modals of Necessity: Needn't Have vs. Didn't Need To	CEFR: C1 Modal Necessity
Skill: Grammar/Writing Subskill: Modal distinction & past necessity Type: Application	
Objective: Distinguish between 'needn't have + past participle' (action occurred, but was unnecessary) and 'didn't need to + infinitive' (action was unnecessary, and may not have occurred).	
Instructions: Select the correct form and explain: 'We [needn't have printed / didn't need to print] 500 hard copies because the conference was shifted to a digital format before printing began.'	
Task Prompt: Output: 'Correct: didn't need to print. Explanation: The shift occurred before printing began, so the action was recognized as unnecessary and was not performed.'	
Expected Output: <i>Advanced</i>	

Activity 79: Impersonal 'It' as Dummy Subject in Stance Statements	CEFR: C1 Dummy Subject Stance
Skill: Grammar/Writing Subskill: Dummy subjects & stance hedging Type: Application	
Objective: Incorporate dummy 'It' subjects with evaluative adjectives (It is imperative that, It is desirable to, It remains uncertain whether).	
Instructions: Draft 2 policy statements using dummy 'It' subjects with evaluative adjectives.	
Task Prompt: Output: '1. It is imperative that municipal transit authorities upgrade electric charging grid capacity. 2. It remains uncertain whether current international carbon offset protocols effectively reduce total global emissions.'	
Expected Output: <i>Advanced</i>	

Activity 80: Editing Passive Overuse in Executive Summaries	CEFR: C2 Executive Tone Audit
Skill: Writing Subskill: Executive tone & voice editing Type: Application	
Objective: Audit an executive summary to strike a professional balance between active agency and objective passive reporting.	
Instructions: Edit: 'It was decided by us that the branch should be closed, and staff were informed by management.'	
Task Prompt: Output: 'Executive management decided to close the regional branch and promptly informed the affected staff.'	
Expected Output: <i>Mastery</i>	

MODULE 9: DETERMINERS, ARTICLES, PREPOSITIONAL PRECISION & PUNCTUATION

Activity 81: Definite Article Precision with Generic vs. Specific Nouns	CEFR: C1 Article Precision
Skill: Grammar/Writing Subskill: Article mechanics in academic prose Type: Application	
Objective: Correct article usage errors involving abstract nouns, generic plurals, and unique academic entities.	
Instructions: Insert or delete articles: 'The research shows that [1] education plays a vital role in [2] economic development of [3] developing nations.'	
Task Prompt: Output: '[1] Ø (no article); [2] the; [3] Ø (or 'the' if specified).'	
Expected Output: <i>Advanced</i>	

Activity 82: Prepositional Idioms in Business & Academic Contexts	CEFR: C1 Prepositional Collocations
Skill: Grammar/Writing Subskill: Dependent prepositions & fixed collocations Type: Application	
Objective: Complete advanced academic sentences using precise dependent prepositions (attributable to, in compliance with, contingent upon, instrumental in).	
Instructions: Insert prepositions: 'Project continuation is contingent [1] board approval and strictly in compliance [2] federal safety guidelines.'	
Task Prompt: Output: '[1] upon / on; [2] with.'	
Expected Output: <i>Advanced</i>	

Activity 83: Semicolons, Colons & Dashes: Advanced Punctuation Mechanics	CEFR: C2 Advanced Punctuation
Skill: Grammar/Writing Subskill: Punctuation for clause coordination Type: Application	
Objective: Deploy semicolons (coordination), colons (amplification/list introduction), and em-dashes (parenthetical emphasis) in executive briefs.	
Instructions: Punctuate: 'The corporate restructuring has three main objectives cost reduction, operational agility, and market expansion however, short-term disruptions remain inevitable.'	
Task Prompt: Output: 'The corporate restructuring has three main objectives: cost reduction, operational agility, and market expansion; however, short-term disruptions remain inevitable.'	
Expected Output: <i>Mastery</i>	

Activity 84: Quantifiers with Count vs. Noncount Abstract Nouns	CEFR: C1 Quantifier Precision
Skill: Grammar/Writing Subskill: Quantifier-noun agreement Type: Application	
Objective: Distinguish correct quantifiers (much/little vs. many/few; amount of vs. number of) when modifying abstract academic nouns.	
Instructions: Correct: 'A large amount of studies demonstrate that fewer advice was provided to rural branch offices.'	
Task Prompt: Output: 'A large number of studies demonstrate that less advice was provided to rural branch offices.'	
Expected Output: <i>Advanced</i>	

Activity 85: Prepositions of Spatial & Temporal Locatives in Graphs	CEFR: C1 Data Prepositions
Skill: Grammar/Writing Subskill: Data description prepositions Type: Application	
Objective: Utilize precise prepositions of trend and extent (peaked at, fluctuated between, increased by X%, stood at) in quantitative data commentary.	
Instructions: Draft a data description sentence incorporating 'peaked at', 'increased by', and 'stood at'.	
Task Prompt: Output: 'Unemployment stood at 4% in Q1, increased by two percentage points during Q2, and ultimately peaked at 7% by year-end.'	
Expected Output: <i>Advanced</i>	

Activity 86: Distinguishing 'Few / Little' (Negative) from 'A Few / A Little' (Positive)	CEFR: C1 Attitudinal Quantifiers
Skill: Grammar/Writing Subskill: Quantifier attitudinal nuance Type: Application	
Objective: Demonstrate the attitudinal shift between 'few/little' (insufficient, negative stance) and 'a few/a little' (some, positive stance) in economic analysis.	
Instructions: Contrast: 'There is little evidence supporting the tax reform.' vs. 'There is a little evidence supporting the tax reform.'	
Task Prompt: Output: '1. 'Little evidence': Expresses skepticism; implies the evidence is negligible and insufficient to prove the claim. 2. 'A little evidence': Expresses modest optimism; acknowledges that some supportive evidence exists.'	
Expected Output: <i>Advanced</i>	

Activity 87: Hyphenation Rules for Compound Modifiers Before Nouns	CEFR: C1 Hyphenation Mechanics
Skill: Grammar/Writing Subskill: Compound adjective hyphenation Type: Application	
Objective: Apply correct hyphenation conventions for multi-word compound adjectives preceding nouns (e.g., long-term investment vs. invested for the long term).	
Instructions: Punctuate: 'A state of the art laboratory facility was constructed to conduct high risk research.'	
Task Prompt: Output: 'A state-of-the-art laboratory facility was constructed to conduct high-risk research.'	
Expected Output: <i>Advanced</i>	

Activity 88: Mastering 'The' with Geographical & Institutional Names	CEFR: C1 Proper Noun Articles
Skill: Grammar/Writing Subskill: Proper noun article conventions Type: Application	
Objective: Apply definite article rules to geographical features, international bodies, and academic institutions.	
Instructions: Insert 'the' where necessary: 'Delegates from [1] Netherlands and [2] United Kingdom met at [3] Harvard University to discuss policy.'	
Task Prompt: Output: '[1] the Netherlands; [2] the United Kingdom; [3] Ø (no article for Harvard University).'	
Expected Output: <i>Advanced</i>	

Activity 89: Punctuation with Parenthetical Elements & Adverbials	CEFR: C2 Parenthetical Punctuation
Skill: Grammar/Writing Subskill: Adverbial punctuation & parentheticals Type: Application	
Objective: Set off introductory adverbials, parenthetical expressions, and non-essential clauses using precise comma placement.	
Instructions: Punctuate: 'Furthermore in spite of initial market skepticism the enterprise software platform unexpected as it may seem generated record revenues.'	
Task Prompt: Output: 'Furthermore, in spite of initial market skepticism, the enterprise software platform, unexpected as it may seem, generated record revenues.'	
Expected Output: <i>Mastery</i>	

Activity 90: Proofreading Punctuation & Article Errors in Published Manuscripts	CEFR: C2 Manuscript Auditing
Skill: Grammar/Writing Subskill: Comprehensive mechanical auditing Type: Application	
Objective: Audit and fix article and punctuation errors in a 100-word excerpt from a student research manuscript.	
Instructions: Correct: 'The economic theory suggests that inflation impacts a purchasing power of consumer, however recent data shows surprising resilience.'	
Task Prompt: Output: 'Economic theory suggests that inflation impacts the purchasing power of consumers; however, recent data shows surprising resilience.'	
Expected Output: <i>Mastery</i>	

MODULE 10: ACADEMIC PARAPHRASING, SYNTHESIS & EDITING PROOFROOM

Activity 91: 3-Tier Paraphrasing Technique: Synonyms, Syntax & Restructuring	CEFR: C1 3-Tier Paraphrasing
Skill: Writing Subskill: Advanced paraphrasing & integrity Type: Application	
Objective: Execute a 3-tier paraphrase of a complex source text by changing vocabulary, altering clause structure, and shifting voice without changing meaning.	
Instructions: Paraphrase: 'Rapid urbanization poses severe challenges to municipal water management infrastructure globally.'	
Task Prompt: Output: 'Worldwide, local city water distribution networks face immense strain as a direct result of accelerating population growth in urban centers.'	
Expected Output: <i>Advanced</i>	

Activity 92: Integrating Direct Quotations with Academic Signal Verbs	CEFR: C1 Quotation Integration
Skill: Writing Subskill: Quotation integration & citation Type: Application	
Objective: Integrate a short direct quotation into an academic sentence using authoritative signal verbs (contends, asserts, posits, highlights).	
Instructions: Integrate quote: 'Artificial intelligence will reconfigure cognitive labor' (Dr. Vance, 2022) using 'posits that'.	
Task Prompt: Output: 'Dr. Vance (2022) posits that artificial intelligence will fundamentally 'reconfigure cognitive labor' across professional sectors.'	
Expected Output: <i>Advanced</i>	

Activity 93: Synthesizing Multiple Sources into a Single Paragraph	CEFR: C2 Multi-Source Synthesis
Skill: Writing Subskill: Multi-source literature synthesis Type: Application	
Objective: Synthesize findings from three distinct researchers (Smith, 2020; Patel, 2021; Zhang, 2023) into one cohesive, thematic literature synthesis paragraph.	
Instructions: Synthesize: Source A (Smith: AI increases healthcare efficiency), Source B (Patel: AI risks privacy), Source C (Zhang: AI requires regulatory balance).	
Task Prompt: Output: 'While Smith (2020) highlights that artificial intelligence significantly enhances operational efficiency in healthcare triage, Patel (2021) cautions that unvetted algorithmic deployment compromises patient privacy. Reconciling these perspectives, Zhang (2023) advocates for balanced regulatory frameworks that preserve clinical efficiency gains while safeguarding data privacy.'	
Expected Output: <i>Mastery</i>	

Activity 94: Diagnosing & Fixing Patchwriting (Unintentional Plagiarism)		CEFR: C1 Patchwriting Repair
Skill: Writing Subskill: Academic integrity & patchwriting repair Type: Application		
Objective: Identify patchwriting (superficial synonym swaps that preserve source sentence structure) and rewrite the passage into an original voice.		
Instructions: Fix patchwriting: Source: 'Global warming threatens coastal agricultural yields.' -> Patchwrite: 'Global heating endangers seaside farming outputs.'		
Task Prompt: Output: 'Rising worldwide temperatures present severe risks to agricultural productivity in low-lying coastal regions.'		
Expected Output: <i>Advanced</i>		

Activity 95: Summarizing Long Research Passages into Concise Abstracts		CEFR: C2 Executive Summarization
Skill: Writing Subskill: Abstract writing & summarization Type: Application		
Objective: Condense a 300-word research case study summary into a crisp, 50-word executive summary covering objective, method, result, and implication.		
Instructions: Draft a 50-word abstract summary of a trial on solar microgrids.		
Task Prompt: Output: 'This study evaluated municipal microgrid solar adoption across three urban districts using longitudinal energy consumption data. Results indicate a 30% reduction in grid reliance and lower carbon emissions. Consequently, decentralized solar microgrids represent a viable policy infrastructure investment for metropolitan climate resilience plans.'		
Expected Output: <i>Mastery</i>		

Activity 96: Secondary Citation Syntax: Citation Within a Citation		CEFR: C1 Secondary Citation
Skill: Writing Subskill: Citation mechanics & secondary sources Type: Application		
Objective: Draft a formal academic sentence utilizing secondary citation syntax (e.g., Smith, 1998, as cited in Johnson, 2021).		
Instructions: Draft a secondary citation sentence citing Smith's original concept found in Johnson's text.		
Task Prompt: Output: 'Early organizational theories regarding workflow autonomy (Smith, 1998, as cited in Johnson, 2021) suggest that decentralized management structures significantly elevate worker satisfaction.'		
Expected Output: <i>Advanced</i>		

Activity 97: Editing for Wordiness & Academic Conciseness		CEFR: C1 Conciseness Audit
Skill: Writing Subskill: Textual conciseness & clutter removal Type: Application		
Objective: Eliminate wordy padding expressions (e.g., due to the fact that -> because; in the event that -> if; at this point in time -> currently).		
Instructions: Trim padding: 'Due to the fact that the experiment failed at this point in time, it is necessary that we conduct a re-evaluation.'		
Task Prompt: Output: 'Because the experiment failed recently, we must re-evaluate our methodology.'		
Expected Output: <i>Advanced</i>		

Activity 98: Evaluating Citation Stance: Neutral vs. Critical vs. Supportive		CEFR: C2 Stance in Citations
Skill: Writing Subskill: Reporting verbs & stance Type: Application		
Objective: Choose reporting verbs that signal different authorial stances toward cited claims (e.g., neutral: state, note; supportive: prove, demonstrate; critical: allege, claim).		
Instructions: Write 3 sentences citing the same study using neutral, supportive, and critical reporting verbs.		
Task Prompt: Output: '1. Neutral: Miller (2022) states that interest rate increases curb inflation. 2. Supportive: Miller (2022) conclusively demonstrates that interest rate increases curb inflation. 3. Critical: Miller (2022) merely claims that interest rate increases curb inflation, overlooking structural supply shocks.'		
Expected Output: <i>Mastery</i>		

Activity 99: Comprehensive Manuscript Proofroom Audit		CEFR: C2 Comprehensive Proofroom
Skill: Writing/Editing Subskill: Full manuscript proofreading & correction Type: Application		
Objective: Audit a 150-word student paper excerpt containing 8 mixed errors (grammar, punctuation, citation format, register) and deliver a fully corrected text.		
Instructions: Audit and fix errors: 'In the study of Smith(2019) it was argued that because climate change is worsening rapidly so governments must act now.'		
Task Prompt: Output: 'In a landmark study, Smith (2019) argued that as climate change accelerates, national governments must implement immediate regulatory interventions.'		
Expected Output: <i>Mastery</i>		

Activity 100: Final Peer-Review Feedback Formatting for Essays		CEFR: C2 Peer Review Writing
Skill: Writing/Editing Subskill: Constructive academic peer review Type: Application		
Objective: Formulate a structured, 3-part peer-review feedback commentary evaluating a classmate's argumentative essay draft.		
Instructions: Draft peer-review feedback covering: (1) Structural Strength, (2) Evidence Gap, and (3) Actionable Revision Directive.		
Task Prompt: Output: '1. Structural Strength: Your thesis statement clearly outlines three distinct controlling ideas, and body paragraph 1 establishes excellent unity. 2. Evidence Gap: Body paragraph 2 relies on general assertions regarding cost savings without providing empirical statistical backing. 3. Actionable Directive: Incorporate specific economic data or peer-reviewed studies in paragraph 2 to validate your financial claims before drafting the final submission.'		
Expected Output: <i>Mastery</i>
